q_id	q_desc	op1	op2	op3	op4	ans
AC1	The field can have a value between _____ in FA Package.	0 to 9	1 to 100	10 to 60	None	A
AC10	In tally to display a list of inventory reports we press _____ function keys	F9	F7	F10	F12	A
AC11	To print reports we use_____ key in tally	Ctrl+p	Alt+p	Shift+p	None of the above	B
AC12	In tally alt+p is used for _____	Print view option	Print	Report	None of the above	A
AC13	In tally,to change the date of the voucher press _____	F2	F4	Ctrl+f2	Ctrl+f4	A
AC14	Import and export of data between tally and other programs is possible through the tally_____ program	ODBC(open database connectivity)	OLE(object linking & embedding)	Clipboard	None of the above	A
AC15	In tally,in ratio analysis we press _____ function key in the display of bills receivable , bills payables report	F6 function key	Alt + f6 function key	F7 function key	None of the above	A
AC16	In tally , to select a company we press _____	F1	F2	F3	F4	A
AC17	Tally is based on mercantile accounting system	TRUE	FALSE			A
AC18	In tally,during voucher entry _____ are used	Groups	Ledger accounts	A or b	None of the above	B
AC19	In tally,base currency information is available in _____ screen	Voucher entry	Company creation	Tally audit	None of the above	B
AC2	Default ledger accounts in tally are _____	Balance sheet & profit & loss profit & loss and trial balance	Profit & loss and trial balance	Cash and profit & loss	Cash and bank	C
AC20	Default 'godown' name in tally is _____	Primary	Main location	A or b	None of the above	B
AC21	Tally vault' is a _____	Security mechanism	Ledger a/c	Cost category	None of the above	A
AC22	To create a sales voucher in tally , you have to press _____	F5	F7	F8	F9	D
AC23	In tally,"credit note" records entry for _____	Sales return	Purchase return	a or b	None of the above	A
AC24	In tally you get currency symbol option from _____ menu	Company creation	Stock items units	Regional setting	None of the above	A
AC25	_____ gives the balance for each day for the voucher type has been selected.	Trial Balance	Daybook	Balance Sheet	None of the above	B
AC26	Tally can maintain company type 'accounts with inventory' by activating feature integrate the accounts with inventory	TRUE	FALSE			A

ID	Question	A	B	C	D	Ans
AC27	For 'stock journal' entry we press _____ in tally	F7	Alt + f7	F10	F11	B
AC28	In tally, method of voucher numbering is/are_____	Automatic	Manual	None	All of the above	D
AC29	In tally,number of users are _____	2	3	4	1	B
AC3	Projected approximation of income or expenses is called _____ .	Balance sheet	Profit & loss a/c	Budget	None	C
AC30	"Administrator" type user is also called 'Auditor' of a company in Tally	TRUE	FALSE			A
AC31	Name of the developer of tally is _____	Peutronics Pvt. Ltd.	Putronics Pvt. Ltd	Puetronics Pvt. Ltd.	Pentasoft	A
AC32	Method of voucher numbering is Tally5.4 is/are _____	Automatic	Manual	None	All of the above	D
AC33	In tally,we use F12 function key for _____	Enter document	Change configuration	A or b	None	B
AC34	To create a log of the import activity in a file _____ is located in the same directory as an executable program in tally	Tally.imp	Tally.ini	A or b	None	A
AC35	In Tally,valuation method option is available from _____	Stock summary	Stock journal	Stock analysis	None of the above	A
AC36	Tally audit feature is available in a company _____	By pressing f11 function key	During the creation of a company	In 'comp info -> security control' option	None	B
AC37	In tally,changes of _____ areas are tracked in the audit features	One	Two	Three	Four	B
AC38	In tally,group company can also be a constituent(member) of another group company	TRUE	FALSE			A
AC39	In tally budget can be on _____	Closing balance	Net transactions	Both a and b	None	C
AC4	The _____ file maintains data that describes the supplier past transaction with the firm in terms of material quality in AIS	Supplier	Suspense	Order	All of the above	A
AC40	In tally,a member company can be a member of more than one group company	TRUE	FALSE			A
AC41	In tally,all the masters have _____main options	Two	Three	Four	Five	B
AC42	In tally,to create a new column in balance sheet press _____	Ctrl+c	Alt+c	Alt+ctrl+c	None of the above	B
AC43	In tally, we can alter ledger details using either single or multiple modes but are not allowed to delete a ledger from multiple modes.	TRUE	FALSE			A
AC44	Tally provides _____ different predefined voucher types.	4	11	16	28	C

AC45	**In tally,a group company is marked with an _____**	*	$	&	^	A
AC46	In AIS,the rejected orders will be stored in a new file called _____	Pending file	Order file	Pending order file	Suspense file	C
AC47	**In tally,the group company must contain at least _____ members**	Two	Three	Four	One	A
AC48	**AIS is a requirement for a firm not a choice .**	TRUE	FALSE			A
AC49	**Data processing consists of _____ major tasks in AIS.**	4	3	2	1	A
AC5	**From voucher entry mode , if we press _____ then we get payment voucher in tally**	F4	F5	F6	Alt+f5	B
AC50	**In AIS,data manipulation can be classified by _____ ways**	1	2	3	4	D
AC51	**A good example of AIS is the one that is used by distribution firms engaged in distributing products or services to their customers**	TRUE	FALSE			A
AC52	**DFD document in AIS is called as _____ diagram**	Flow	Chart	Context	All of the above	C
AC53	**All the rejected orders will be stored in _____ file in AIS**	Customer	Suspense	Order	None of the above	B
AC54	**To change the period in tally press _____**	F2	F4	Alt+f2	Ctrl+f2	C
AC55	**Copy of supplier's invoice is called _____ in AIS**	Packing slip	Gate pass	Challan	None of the above	C
AC56	**Different types of valuation methods are available in tally if you press _____**	F7	Alt+f7	Ctrl+f7	F6	A
AC57	**In tally ,ctrl+n is used for _____**	Valuation	Text	Open calculator	None of them	C
AC58	**In tally,for backup of a company , press_____**	F3	F4	F7	None of them	B
AC59	**What is the default financial year in Tally5.4 _____**	1-4-1995 to 31-3-1996	1-4-1996 to 31-3-1997	1-4-1997 to 31-3-1998	None of the above	B
AC6	**In AIS "decrease of idle machine time and increased output by proper scheduling" is it true in AIS?**	Yes	No			A
AC60	**You will get company information , if you press _____ from gateway of tally**	F3	Ctrl+f3	Alt+f3	None of the above	C
AC61	**Default stock category in tally is _____**	Main location	Primary	Symbol	None of them	B
AC62	**Tally format of data is compatible with other formats and the mode of data exchange happens through XML(Extensible Mark-up Language)**	True	False			A
AC63	**The orders that can be filled, are entered in a _____ file**	Open	Reorder	Back order	All of the above	C
AC64	**Default number of groups in tally are _____**	128	228	28	16	C

AC65	Orders that do not pass the credit check are filled in the _____ file in AIS	Sales order	Sales order credit	Sales order credit reject	All of the above	C
AC66	Accountss receivable report provides a clear picture of outstanding for _____ in Tally	Customers	Suppliers	A and B	None	A
AC67	The basic steps for accounts compilation are _____ .	2	4	6	10	B
AC68	An _____ is the official notice that the firm sends to its customers to advise them of the amount of money that is owed	Invoice	Bill	All of the above	None of the above	C
AC69	'EDI' stands _____ .	Sales local cash/cheque	Sales local credit	A and B	None of the above	A
AC7	In tally,the use of group behaves like a sub-ledger, option is that we can summarize many ledger accounts into one line statements	TRUE	FALSE			A
AC70	Tally encrypts and stores TALLY DATA at the data directory	True	False			A
AC71	In AIS, the information stores in a database is called -------------- ------- subsystems	Components Based Information System	Computer Based Information System	Company Based Information System	All of the above	B
AC72	The accounts payable system is responsible for paying the suppliers for the ------------------	Sales	Purchases	A or B	None of the above	B
AC73	The value of the inventory is included as an asset on the balance sheet	True	False			A
AC74	It is necessary to manipulate data to transform it into ------------- ---	Report	Output	Information	None of the above	C
AC75	EDI stands for	Exchange Data and Information	Electrical Data Interchange	Electronic Data Interchange	None of the above	C
AC76	------------------- statements help management in the decision making process	Cash Flow	Fund Flow	Cash Flow & Fund Flow	None of the above	C
AC77	A Group Company is simply a name and an identify given to the merged accounts member companies of the group.	True	False			A
AC78	Owner(Security Control) has full access and rights to all parts of Tally except ---------------	Tally Vault	Tally Audit	Both A and B	None of the above	B
AC79	A Group Company can also be a constituent of another Group Company	False	True			B
AC8	In tally,to cancel a voucher entry we press _____	Alt+x	Alt+d	Alt+c	Ctrl+d	A

Code	Question	A	B	C	D	Ans
AC80	**Tally provides the capability to the administrator/auditor to track changes in the areas is/are**	Changes in transactions or vouchers	Changes in Ledger Masters	Both A and B	None of the above	C
AC9	**Tally can maintain budget _____**	On net transactions	On closing balance	Both a & b	None	C
BC1	**ISDN stands for _____.**	Integrated system dynamic networks.	Integrated Symbolic Digital networks.	Integrated Services Digital network.	None of the above.	C
BC10	**The computer which can receive data from other computers on the network and print it is _____**	File server	Printer server	Receiver	None of the above.	B
BC11	**The hardware and the software requirements together form the_____**	platform	configuration	package	system	A
BC12	**ATM, Asynchronous transfer mode is a _____ technology.**	MAN and WAN	LAN and WAN	LAN and MAN	LAN WAN and MAN	B
BC13	**_____ is designed telephone system**	ISDN	ATM	Internet	Intranet	A
BC14	**Expansion of ISDN is _____**	Internal Services Digital Network	Internal Services Design Network	Integrated Services Digital Network	None of the above.	C
BC15	**Expansion of WBT is _____**	Web based Training	Web based Technology	Web based Transport	Web based Transaction	A
BC16	**_____ connects LANs.**	Bridges	Routers	Protocol	Repeaters	B
BC17	**Collection of instruction is called a _____**	procedure	batch	command	program	D
BC18	**Combination of alphabetic and numeric data is called _____ data**	alpha numeric	alpha beta	numerous alpha	number and alpha	A
BC19	**Computers can be classified based on _____,_____and _____**	space occupied, price, no. of users allowed	cost, performance their ratio	size, performance, cost	input, output, performance ratios	C
BC2	**_____ is the Worlds largest computer network .**	Ethernet	Internet	ARPANET	None of the above.	B
BC20	**_____ are used in large organizations for large scale jobs**	mini computers	microprocessors	PCs	mainframes	D
BC21	**_____ is responsible for feeding data into the computer**	input	output	feed	write	A
BC22	**_____ is the capability of the o/s to run numerous applications simultaneously**	multiprocessing	multithreading	multiplexing	multitasking	D

ID	Question	A	B	C	D	Ans
BC23	_____ involves conversion of raw data into some meaningful information	interpreter	compiler	converter	process	D
BC24	_____ is responsible for obtaining the processed data from the computer	input	processor	ram	output	D
BC25	_____ printers use light to produce the dots needed to form pages of characters	impact printers	drum printers	non-impact desktop printers	thermal printers	C
BC26	Hardware components in a computer are _____,____,_____,_____	operating system, bootstrap, kernel, shell	control program, interpreter, assembler, compiler	monitor, program, keyboard, bus	CPU, memory, input, output	D
BC27	_____ software are programs that are complex and can be developed or purchased	operating system	application software	windows 95	interpreter	B
BC28	_____ is a set of special instructions used to communicate effectively with the computer	batch	protocols	software's	procedures	C
BC29	_____ converts a high level language into machine language	processor	compiler	assembler	coder	B
BC3	_____is/are a popular front end tool	visual basic	power builder	SQL * plus	all of the above	D
BC30	_____ translates assembly language program into machine language instructions	compiler	interpreter	assembler	processor	C
BC31	_____ software enables users to send and receive data to/from remote computers	application	system	operating system	communication	D
BC32	A _____ is a running instance of an application	project	model	pilot project	process	D
BC33	Splitting of CPU's time for different tasks _____ prevents time slicing	multiprocessing	multithreading	multiplexing	multitasking	D
BC34	_____ computers are used in large organizations for large scale jobs which have large storage capacities	mainframes	super computers	micro computers	none of the above	A
BC35	_____ is responsible for all calculations and logical operations that have to be performed on the data	control unit	arithmetic and logic unit	central processing unit	none of the above	B
BC36	_____ printer use laser light	band printer	drum printer	non impact printer	none of the above	C
BC37	_____ software enhances the user to enter ,store, manipulate and print any text	data management	word processing	electronic spreadsheet	none of the above	B
BC38	_____ software enables users to send and receive data to/from remote computers	integrated software	communication software	idea processor	none of the above	B
BC39	_____ is the temporary storage place for deleted files	my computer	recycle bin	Microsoft exchange	none of the above	B
BC4	When LAN connected together ,it is called _____ .	MAN	WAN	GAN	None of the above.	B

Code	Question	A	B	C	D	Ans
BC40	_____ is a collection of related fields	field	file	record	none of the above	C
BC41	_____ language consists of strings of binary numbers	assembly language	machine language	high level language	none of the above	B
BC42	_____ symbol is used to represent processes like assigning a value to a variable or adding a number	terminator symbol	processed symbol	connector symbol	input/output symbol	B
BC43	_____ is an example for micro computer	PC-at	hp vectra system	fazitsu vp200 series	IBM-PC	B
BC44	_____capability supports concurrent users doing different tasks	multiprocessing	multithreading	multiplexing	none of the above	D
BC45	The _____ do not have processing power of their own and has only a screen, keyboard and the necessary hardware to communicate with the host. For this reason, the terminals are referred as_____	"dumb terminals"	dumb servers	dummy terminals	dummy servers	A
BC46	A_____is nothing but a PC with a network operating system	wan	distributed computing system	windows NT	LAN	D
BC47	_____system is responsible for handling the screen and user I/O processing	host	server	back end	front end	D
BC48	The_____ handles data processing and disk access in a Client/Server architecture	host	server	back end	front end	C
BC49	Both the DBMS and the application resides on the same component in a ____system	PC	LAN	distributed computing	centralized	A
BC5	TCP/IP stands for _____ .	Transfer control protocol/Internet protocol	Transfer communication protocol/Internet protocol	Transmission control protocol/Internet protocol	None of the above.	C
BC50	When all the processing is done by the mainframe itself, the type of processing is sometimes called as	server processing	host processing	dumb processing	data processing	B
BC51	DBMS models can be grouped under____ categories	four	one	two	many	A
BC52	_____is the most advantageous database system	file management system	hierarchical database system	network database system	relational database system	D
BC53	A new user initiates a new process of execution at the background,while the user can continue his query process as usual in the foreground. This situation is referred to as _____	multiprocessing	multithreading	multiplexing	none of the above	B
BC54	The process of data being automatically written to a duplicate database is called_____	repairing	redo logging	disk defragmentation	disk mirroring	D

Code	Question	A	B	C	D	Ans
BC55	**Modem stands for _____ .**	Code/De-code	Modulation/Demodulation	Module/De-module	None of the above	B
BC56	**Multiple changes to the same record or a field are prevented by the DBMS through_____**	fixes	locks	constraints	traps	B
BC57	**_____allows an application to multitask within itself**	multiprocessing	multithreading	multiplexing	none of the above	B
BC58	**LAN stands for _____ .**	Linear area networks	Local area networks	Local array of networks.	None of the above	B
BC59	**New process of execution is referred to as_____**	task	process	thread	client-server	C
BC6	**Data is broken into small unit called _____ .**	Cells	Bits	Packets	None of the above.	C
BC7	**SMTP stands for _____ .**	System modulation transfer protocol	Software Mail transmission protocol	Simple Mail transfer protocol	None of the above.	C
BC8	**The _____ protocol is a network protocol to be built for the World Wide Web .**	Transfer Protocol	Transmission protocol	Hyper text	None of the above.	C
BC9	**ATM stands for _____ .**	Aggregate transfer mode	Asynchronous transfer mode	Area transfer mode	None of the above.	B
CA1	**Using generalized audit software packages can add a lot of value _____**	to an audit department's products & services	to add customers	all the above	none of these	A
CA10	**_____ is used for CAAT as database**	Oracle	ACL	JCL	none the above	A
CA100	**Generalized audit software perform auditors to undertake any past records and not concurrent auditing**	True	False			A
CA101	**Generalized audit software is a file whose capabilities for verifying processing is logic**	True	False			B
CA102	**CAAT's are computer program and data that auditor uses as part of the audit procedures to process data if audit significance contained in an entity information system**	True	False			A
CA103	**CAAT do not contains package programs, purpose written program, utility programs or system management programs**	yes	no			B
CA104	**Embedded audit routines are sometimes built into an entity's computer system to provide data for later user by the auditor**	true	false			A
CA105	**SCARF involves embedding audit software modules within an application system to provide continuous monitoring**	true	false			A

CA106	**Concurrent use auditors as the member of the system**	true	false			A
CA107	**Regular cross system verification may minimize frauds**	true	false			A
CA108	**Computer security is frequently associated with confidentiality, integrity and authentication**	true	false			A
CA109	**Data reserve engineering process metadata to document system and abstract business rules and relationship**	true	false			A
CA11	**The first step for developing CAAT is_____**	to determine the audit objective	review and evaluate the types of data	to obtain a record layout	extract data from file	A
CA12	**Using the open database connectivity feature in ACL is _____**	can bring the data directly	can bring the data indirectly	all the above	none of the above	A
CA13	**Computer Assisted Audited Technique involves the use of computers through "Black Box Approach"**	True	False			B
CA14	**White Box Approach necessary involves expert knowledge on the part of Auditor**	True	False			A
CA15	**The transition from manual system to CIS environment bring dramatic changes including _____**	change in the method of recording accounting transaction	use of accounting codes	absence of audit trails	all the above	D
CA16	**Auditing with computer necessarily supports the**	documents driven approach	risk driven approach	unique approach	none of the above	B
CA17	**CAAT involves an Auditors' appreciation of _____**	hardware and software configuration	processing options, file data structure	checks and controls	all the above	D
CA18	**Widespread end use computing result in unlimited errors creeping into system going to accept handling, thereby increasing audit risks**	true	false			A
CA19	**For computerized auditing usage of sophisticated audit software would be a necessity**	true	false			A
CA2	**Important knowledge needed to begin planning the use of CAAT is _____**	the source of data available to the audit organization	source of data for material planing	all the above	none of these	A
CA20	**The move towards paperless EDI would eliminate much of the traditional audit trail, radically changing the nature of audit evidence**	true	false			A

CA21	Computer operation controls are designed to provide _____	the of by all concerned	providing access to computer to all organization personnel	use of any programs	none of the above	D
CA22	Systems development control, apart from others, include authorization, approval, testing, implementation and documentation of new systems software and system software modification	true	false			A
CA23	A system could be _____	natural/man-made	open/closed	conceptual/physical	all of them	D
CA24	A system exhibits 'entropy'	true	false			A
CA25	Super computer are the largest and fastest and is very suitable for commercial application including audit work	true	false			A
CA26	Assembler language uses Mnemonic symbols	true	false			A
CA27	Operating systems are devised to optimize the machine capabilities, the function include_____	scheduled jobs	manage hardware & software resources	enable multiple user resource sharing	all the above	D
CA28	General purpose software provides a framework for highly complex scientific operation	true	false			B
CA29	In batch processing, transactions are processed one after another	true	false			B
CA3	The use of computer assisted audit techniques is not gaining popularity not only _____	with audit departments	with production departments	all the above	none of these	A
CA30	On-line processing refers to grouping of transaction and processing the same in one go from start to finish	true	false			A
CA31	Real time refers to the technique of updating files with transaction data immediately after the occurrence of the event to which it relates	true	false			A
CA32	In OLRT the CPU should process the capability of program interruption	true	false			A
CA33	Time sharing system allow access to a CPU from remote terminals	true	false			A
CA34	DSS is defined as a system that provides tools to managers to assist them in solving structured problems	true	false			B
CA35	DSS has the following components _____	databases	planning language	model base	all the above	D
CA36	Master files contains current records for identification and summarizing	true	false			B

ID	Question	A	B	C	D	Ans
CA37	Transaction files contain relatively permanent records take product profile, customer profile, employee profile etc	true	false			B
CA38	Master file configuration includes _____	reference files	table files	report files	none of the above	D
CA39	_____ is a file management software package that lets users and programmers organize data into files and then process those files	filex	file-o-man	file manager	filepet	C
CA4	CAATS provide added value to the clients because _____	to have a complete picture of a system	decentralized picture of a system	all the above	none of the above	A
CA40	File volatility refers to the number of addition and deletions to the file in a given period of time	true	false			A
CA41	File activity is the proportion of transaction file records that are actually used and accessed in a given processing run:	true	false			B
CA42	File interrogation refers to the _____ of information from a file	back-ups	retrieval	deletion	addition	B
CA43	One -to-one relationship means a single entity to a single entity in a monogamous structure	true	false			A
CA44	RDBMS is structured to a series of 2 dimensional tables	true	false			A
CA45	SADB stands for _____	seriously affected database	subject area database	software and database	safety and database	B
CA46	Controls are present over many aspects of the computer system and its surrounding social environment	true	false			A
CA47	In framed checking the data entry is checked against an expected picture or format	true	false			B
CA48	Errors are correlated_____	at the year end	immediately	on quarterly basis	none of the above	B
CA49	Field check is exclusive to a field	true	false			A
CA5	_____ law basically states that there is a specific probability of the first digit of a no. being 1,2,3 etc	Benfish	Benford	Benjamin	none of the above	B
CA50	Check digit is a group of nos. added to a code for determining the accuracy of other digits in the code	true	false			B
CA51	Hierarchical code means _____	consecutive nos. or alphabets to entities	blocks of nos. to the primary attribute of the the entity	random placement of component	none of the above	D

Ph.- 9253868698

CA52	**The validation checks applied to a field depend on the field's logical inter relationships with other fields in the record**	true	false			A
CA53	**The contents of a field could determine _____ sign for a _____ field**	valid, numeric	invalid, alphabetic	none of the above	all the above	A
CA54	**Batch is the process of _____ together _____ that bear some type of relationship to one another**	grouping, transaction	regrouping, events	none of the above	all the above	A
CA55	**Hash totals means meaningless totals**	true	false			A
CA56	**With OLRT where interactive data entry is available, the master file associated with a transaction may be searched for confirming data**	true	false			A
CA57	**Controls are required for authorization to ensure data integrity and detect possible breaches in security**	true	false			A
CA58	**Data from client application are not stored in the organization's database through auditables events and function**	true	false			B
CA59	**All input records in a batch are normally of different types**	true	false			B
CA6	**IDEA stands for _____**	incremental design and enlarge activity	interactive data extraction and analysis	interactive data innumerable analysis	none of the above	B
CA60	**A transaction file is sorted prior to the update of master file**	true	false			A
CA61	**A sequence check on the transaction or master files by an update program is not required**	true	false			A
CA62	**Whenever monetary transactions are processed against master files, the update program should maintain a correlation account to record such transaction that does not have a matching master file record**	true	false			B
CA63	**Internal tables are stored tables from which certain values are extracted for further processing and storing**	true	false			A
CA64	**For small to medium sized systems, individual modules are coded and individually tested and then assembled to be tested as a whole-the testing strategy is referred to as _____**	e-brain	bouncing ball	big-bang	stub	C
CA65	**In systems testing, test involves_____**	bottom up tests	top-down tests	hybrid tests	all the above	D
CA66	**Recording transactions in a controlled manner may amount to loss of stored data**	yes	no			B

ID	Question	A	B	C	D	Ans
CA67	Audit software is used by the auditor to _____	read data on client's file	provide information to the audit	re-perform procedures carried out by the clients programs	all the above	D
CA68	Core image comparison is a software used by the auditor to compare _____ version of a program with a secure _____ copy	executables, master	deleted, hard	none of these	all the above	A
CA69	Database analyzer is a software which provides detailed information concerning the operation of the database	true	false			A
CA7	SAS stands for _____	system analysis software	system advanced software	all the above	none of the above	A
CA70	Embedded code is a software used by the auditor to examine backup data	true	false			B
CA71	Embedded code performs wide variety of audit task	yes	no			A
CA72	Core image comparison is particularly useful where only executable versions are distributed	true	false			A
CA73	Log analysis is a software used by auditor to detect virus	true	false			B
CA74	On line testing techniques the auditor _____ data either _____ or fictitious in order to see that a specific program or sever edit test is doing its work	manipulates, real	create, false	none of these	all the above	A
CA75	Mapping software is used by the auditor to list unused program instructions	true	false			A
CA76	Mapping software has very objectives	yes	no			A
CA77	Modeling is a variety of software which _____	can be very powerful analytical tool	can enable the auditor to execute provisions on a number of different bases	can provide the auditors with useful information with trend s and patterns	all of the above	D
CA78	On line testing can be targeted for specific functions carried out by programs	yes	no			A
CA79	Program code analysis involves _____	provides detailed information of machine uses	identifies program code which may be there for fraudulent reason	examination of source code of a program with advice to following the logic of a program	none of the above	C
CA8	_____ is a software of CAAT	IDEA	ACL	ALC	ACLL	B

CA80	Snapshot is software which takes a picture of a file or data or a transaction passing though the system	true	false			A
CA81	Base case system evaluation includes_____	fictitious data applied against the client program	comparison of source version of a programmed	analyzing the picture of a file or data	all the above	A
CA82	While base testing forces on finding if there are any defective execution policies in a program	true	false			A
CA83	Black box testing seeks to determine whether application output is what it is supposed to be	true	false			A
CA84	In integrated test facility approach the auditor should ensure that the impact of test transaction is subsequently eliminated from the computer files	true	false			A
CA85	Black box testing is _____ based and white box testing is _____ based	specification, program	file, hardware	none of the above	all the above	A
CA86	Source code review means_____	identifying erroneous code	identifying ineffective code	identifying non-standard code	all the above	D
CA87	In formula in flow hypothesis the auditor should expand the extent of substantive tests to determine how the defects may impact the attainment of the program objectives	true	false			A
CA88	All material application oriented events that occur within the boundary subsystem should be recorded in the accounting audit trail	true	false			A
CA89	In examination of audit trail the following data associated with an event may be _____-	start and finish time	authentication of information support	resource requested	all the above	D
CA9	JCL means_____	job control language	job connectivity language	all the above	none of the above	A
CA90	Audit should be periodically analyzed to detect any control weakness of the system	yes	no			A
CA91	In an accounting audit trail, intrusion detection system might monitor the amount of processor time consumed by the user to detect unusual deviation from the amount processor time requested by the user in the past	true	false			A
CA92	A sample size calculator program assists auditors in determining RAND() function	true	false			B

CA93	**Generalized audit software consists _____**	package computer p[program for performing a variety of data processing function	mathematical concept	master list of transactions	administered questionnaire	A
CA94	**Specializes audit program may be_____**	prepared by the auditor	prepared by the entity	prepared by an outside programmer engaged by the auditor	all the above	D
CA95	**Generalised audit software could be used by the following in consistencies or significant fluctuations**	true	false			A
CA96	**Generalized audit software function include_____**	file access/organizations	statistical/arithmetic operation	stratification and frequency analysis	all the above	D
CA97	**In the file reorganization merging capabilities are needed in data from separate file is to be combined on a separate work file**	true	false			B
CA98	**Auditors cannot use generalised audit software to extract the data needed for audit purpose**	true	false			B
CA99	**Auditors can combine functional capabilities of generalized audit software to accomplish the task of _____**	examining the quality of system process	carrying analytical review	examining the quality of data	all the above	D
DA1	**Sequence Check is a ---------------- level control check.**	Field	Record	Both	None of the above	A
DA10	**Analyse data over two or more periods is called ----------------------- analysis**	Horizontal	Vertical	A or B	None of the Above	A
DA11	**We use Hash Total to identify ------------ within a series where there is a definite relation between items**	Duplicate Value	Combined Value	Gaps	All of the above	C
DA12	**Analyse fields by arranging them into rows and columns is called**	Cross Tabulate	Filter	Merge	None of the above	A
DA13	**---------------------- function searches for a value in the leftmost column of a table and then returns a value in the same row from a column that we specify in the table.**	RAND()	VLOOKUP()	HLOOKUP()	None of the above	B
DA14	**To import data from Access to Excel ,it is not possible to link between Access and Excel sheet**	TRUE	FALSE			A
DA15	**The GAP detection options can be used to test for completeness of data.**	TRUE	FALSE			A

DA16	Exception testing can be used to identify ----------------- items	Unusual	Strange	A or B	None of the above	C
DA17	Data validity test represents	exception testing	comparison of data	duplicates testing	All of the above	D
DA18	Year end ledger, inventory files or transaction files can be tested for cut-off , to ensure that the data has been provided is for the correct audit period	True	False			A
DA2	In Range Check , the data may not be in proper sequence but should be within a predetermined range	True	False			A
DA3	In ---------------- Check data entry follow a particular sequence and also a predetermined range.	Limit	Sequence	Range	Both B & C	B
DA4	'Set mapping' Check control that follows a text-type validation, we use ----------------- application for data analysis.	Excel	Access	Both	None of the above	B
DA5	Excel can import data from other databases for the data analysis.	True	False			A
DA6	A System Auditor can uses CAAT tools to analyze data	False	True			B
DA7	In the case of the ---------- control, it is ensured that the data in combination with other fields are reasonable as per standard set by an organisation.	Valid Signs	Transaction type	Limit Check	Reasonableness	D
DA8	---------------- function searches for a value in the leftmost column of a table and then returns a value in the same row from a column that we specify in a table	HLOOKUP	VLOOKUP	A or B	None of the above	B
DA9	Most of the tools use in Data Analysis depends on	DDE	OLE	ODBC	All of the above	C
DB1	_____ data type is generally used for fields assigned as primary keys in a table	integer	number	primary number	auto number	D
DB10	MS access objects can be published in the web	true	false			A
DB100	In code-builder, got_focuse, click,dbl_click,enter are examples of _____	actions	events	procedures	none of the above	B
DB101	_____can be used to automate certain actions in response to events	report	form	chart	macros	D
DB102	In the macro sheet the macro is selected in the _____field	macro	expression elements	comments	action	D
DB103	To build complex expressions_____is used	calculator	code builder	expression builder	expression elements	C
DB104	The three list boxes present at the bottom of the expression builder are called_____	action list	macro list	expression elements list box	none of the above	C
DB105	_____option is selected from the view menu to create macros with conditions	conditions	action	insert	none of the above	A

ID	Question	A	B	C	D	Ans
DB106	_____report can be created with minimum user input	tabular	columnar	auto report	embedded	C
DB107	_____layout of a form displays one record at a time	tabular	columnar	datasheet	justified	B
DB108	The table or query name on which we are going to build our report is selected from the _____ dialogue box	create report	link report	embedded report	new report	D
DB109	_____and_____are the two types of auto reports available	columnar and tabular	stable and unstable	dynamic and static	none of the above	A
DB11	There are no wizards for creating a database in access	true	false			B
DB110	_____option from the insert menu option is chosen to add an embedded chart	create fields	add chart	chart	insert chart	C
DB111	In ms-access, while using SQL, references constraint is used for creating _____	primary key	alternate key	foreign key	none of the above	C
DB112	_____is used to create a mailing label	label wizard	chart wizard	mail wizard	none of the above	A
DB113	_____header is present at the beginning of the report	start header	group header	page header	report header	D
DB114	_____is present at the bottom of each page in a report	report footer	page footer	group footer	none of the above	B
DB115	In SQL, having clause is used for _____	for ordering records	for updating records	for specifying conditions with group by clause	none of the above	C
DB116	_____field is added to the macro sheet when we select grouping option from the view menu	condition	group	macro names	none of the above	C
DB117	_____can be used to create toolbars	VB Modules	reports	forms	macros	D
DB118	_____query is used to add records from one or more tables into an existing table	add	append	insert	delete	B
DB119	_____window is used to write VB code in access application	report	macro sheet	module	none of the above	C
DB12	Values for other tables, queries are maintained in look up fields data type	true	false			A
DB120	Visual Basic language is a _____ tool	RAD	RAP	RAID	none of the above	A
DB121	_____ function is used to display a message box	SysCmd	MsgBox	message	none of the above	B
DB122	Other ms-office applications can be accessed from ms-access using a concept called _____	OLE	DDE	CME	none of the above	A
DB123	OLE stands for_____	object linking and embedding	on line execution	on line editing	none of the above	A
DB124	The application that supplies data in OLE is called an _____	OLE object	OLE client	OLE server	OLE communicator	C

ID	Question	A	B	C	D	Ans
DB125	If any change made on the object from the client side is reflected on the server then the object is said to be _____	linked	embedded	connected	edited	A
DB126	_____is the file format that works on internet	exe	DLL	BMP	html	D
DB127	_____ is used to convert any ms-access object into html format	form wizard	report wizard	query wizard	publish to web wizard	D
DB128	_____ option in publish to web wizard produces a page that is static in nature	static file	static html	dynamic file	none of the above	B
DB129	_____query is used to create or change database objects in a current database	append	add	insert	data definition	D
DB13	Currency fields express the amount in _____	dollars	rupees	pesos	yen	A
DB130	_____is selected from the toolbar to add an OLE object	unbound object	bound object	command button	list box	B
DB131	To display an OLE object in the form of an icon ____ option is selected from insert object dialogue box	display as icon	display	link	create icon	A
DB132	_____option from the file menu is selected to run 'publish to the web wizard'	create html	new	save as html	none of the above	C
DB133	_____page in an web application is used to navigate to the rest of the pages in the application	startup	home	end	none of the above	B
DB134	_____ is fired when an event is triggered is the concept based on a Visual Basic language	bullet	command	procedure	none of the above	C
DB135	Ms access is a _____	DBMS	RDBMS	front end	language	A
DB136	A collection of data stored in different objects is known as a _____	data group	data collection	database	data storage	C
DB137	A blank database can be created using _____	new dialog box	new blank database dialog box	new database dialog box	database dialog box	A
DB138	Text type data can be of _____ characters in ACCESS	255	64000	235	63500	A
DB139	_____is a datatype that assigns values automatically	automatic number	AutoNumber	number	automatic field	B
DB14	Tables cannot be imported from other databases	true	false			B
DB140	If two tables having same values for the fields are joined it is called an _____	inner join	outer join	explicit join	none of the above	A
DB141	Duplication of records in a field won't be allowed if the fields are declared a_____	primary key	not null	candidate key	no duplicate key	A
DB142	Changes from a master table can be reflected on to the child table by selecting _____option	cascade delete related records	cascade change related records	cascade update related fields	change all related records	C
DB143	To see more than one record at a time in a form we use _____	columnar	tabular	both a and b	none of the above	B

ID	Question	A	B	C	D	Ans
DB144	In SQL, delete command is used to remove _____	table or tables	query or queries	record or records	none of the above	C
DB145	In MS-Access, filter excluding selection will display only those record(s) which meet the criteria.	true	false			B
DB146	Properties of the fields are managed by _____ in Dynaset	property field	field property	Dynaset field properties	properties	B
DB147	_____queries allows us to view data in row by column manner	crosstab queries	row/column queries	select queries	update queries	A
DB148	The type of queries that can update or delete record(s) in a table(s) are called _____	action queries	row/column queries	change/delete queries	update queries	A
DB149	Joining tables without any matching values in the fields is called _____	inner join	self join	no match join	outer join	D
DB15	Primary key uniquely identifies each record	true	false			A
DB150	Which of the following dialog box is/are used in the creation of form _____	new form dialog box	form create dialog box	form wizard dialog	both 1 and 3	D
DB151	_____ query wizards are used to generate summary calculations for a table	summary	sum	append	simple	D
DB152	Properties of a form can be changed by selecting _____from view menu options	change properties	properties	form properties	new properties	B
DB153	Forms that are included in other forms are called _____	included form	sub form	new form	child form	B
DB154	In MS-Access, while using form design view, for creating a command button for adding a new record, we should select the _____ category from the command button wizard	Record Navigation	Record Operations	Form Operations	None of the above	B
DB155	_____ form displays fields in a single horizontal row	columnar form	tabular form	hierarchical form	one to many form	B
DB156	The process of arranging the data in a meaningful order is known as _____	filtering	ordering	sorting	querying	C
DB157	_____ are used to select only some particular records from the table or any other database objects	filter	sorts	pipes	gateways	A
DB158	In MS-Access, user may specify criteria for filter in form view using _____	filter by form	filter by selection	filter by menu	None of the above	A
DB159	___wildcard character represents any single character	*	$	@	?	D
DB16	Records cannot be sorted by a primary key	true	false			B
DB160	A control without a data source is known as _____	bound control	unbound control	data less control	data control	B
DB161	Set of related option buttons, check boxes and toggle buttons is known as _____	button group	option group	controls group	record group	B

DB162	The collection of related data and objects is called a _____	database	form	collection	none of the above	A
DB163	Which of the following is control types _____	bound	unbound	controlled	all of the above	C
DB164	In MS-Access, the function that gives the current date is _____	CURRDATE()	TODAY()	DATE()	DAY()	C
DB165	_____is a control that lists set of data	text box	list box	combo box	static text	B
DB166	_____is a form that summarize large amount of data	pivot table	columnar form	tabular form	main form	A
DB167	_____allows to create a filter by typing the value in a data sheet	data sheet filter	filter by input	filter by form	none of the above	C
DB168	Wizards for toolbox controls are called a _____	button wizard	control wizard	option control wizard	tool wizard	C
DB169	The wild card representation for any 5 letter word that starts with ram is _____	ram*	ram??	two of the above	none of the above	B
DB17	Look up fields slow up data entry	true	false			B
DB170	____is an access object that displays un-editable data	report	form	table	ledger	A
DB171	_____option from the new object toolbar gives the easiest way of generating a report	autoreport	report	module	none of the above	A
DB172	_____ represents data in a pictorial format	chart	label	bitmap	report	A
DB18	Changes of one table can be carried over to another related table	true	false			A
DB19	Hyperlinks are used to jump to any kind of information or data from a file	true	false			A
DB2	The memo field can have text upto_____ characters in length	60,000	255	25,000	64,000	D
DB20	In MS-Access, columnar layout can be used to view multiple records in a form	true	false			B
DB21	In MS-Access, alter command may be used in adding a primary key to a table	true	false			A
DB22	Update query is used to add records from one or more tables to the end of an existing table	true	false			B
DB23	In ms-access, datasheet view is available in _____	table	query	form	all of the above	D
DB24	_____are used to jump to any kind of information from a datasheet or a form	table	form	report	hyperlink	D
DB25	Home page will always be present as a first page of an application	true	false			A
DB26	Make table queries create a new table from the records of another table	true	false			A

DB27	In ms-access, to protect a database file from illegal access, we may set database password. The option of setting database password is available in _____ menu	Insert	Records	Tools	none of the above	C
DB28	Foreign key is a field that uniquely identifies each record and accept no null values	true	false			B
DB29	Data definition queries are used to create or change database objects	true	false			A
DB3	The attributes of a composite key are known as _____	alternate keys	composite keys	candidate keys	primary key	C
DB30	OLE object is a data type in access	true	false			A
DB31	Data displayed in forms cannot be edited	true	false			B
DB32	A sub form is used to display one to many relationship between tables	true	false			A
DB33	We can switch from datasheet view to form view by selecting view -> form view option	true	false			A
DB34	In MS-Access long integer is a datatype	true	false			B
DB35	In MS-Access, while designing a table for a particular field, the Required parameter is set to yes. This validates the field as _____	null	not null	zero	none of the above	B
DB36	Sorting is applied to select only some particular records	true	false			B
DB37	Filter by form can be created from a forms shortcut menu	true	false			B
DB38	Advanced filter uses a filter similar to the query design window to create a filter	true	false			A
DB39	? Wildcard character represents any number of characters	true	false			B
DB4	_____ of the following is/are a type of chart	pie	bar	both 1 and 2	none of the above	C
DB40	A bound control is tied to a underlying query or table	true	false			A
DB41	A calculated control uses expression as a source of data	true	false			A
DB42	Text boxes cannot be bound controls	true	false			B
DB43	The default query invoked by ms-access is	update query	select query	delete query	append query	B
DB44	A control can be bind to a record using row source property	true	false			B
DB45	List box is a control that offers a list of choices	true	false			A
DB46	If a table is joined to itself it is called a _____	inner join	outer join	self join	table join	C
DB47	A picture box combines the activities of both a text box or a list box	true	false			B
DB48	Line is a tool box control	true	false			A
DB49	Text boxes can be part of a option group	true	false			B

ID	Question	A	B	C	D	Ans
DB5	_____ chart exists as a separate object	freestanding	embedded	stand alone	sub chart	D
DB50	Filtering data is a way of arranging data in a meaning full order	true	false			B
DB51	Wild card characters are used for sorting records	true	false			B
DB52	Pivot tables are used to navigate to the other tables in a database	true	false			B
DB53	Reports are used to represent un-editable data	true	false			A
DB54	In MS -Access, the records in a table are sorted based on _____	the first field of the table	the last field of the table	primary key field	none of the above	C
DB55	Relationship is an association between _____	forms	reports	attributes	entities	D
DB56	Summary options dialog box is used to summarize data	true	false			A
DB57	_____ queries can be used to delete a group of records that meet some specific records	delete	insert	append	add	A
DB58	Charts can convert numerical data in a easily understandable format	true	false			A
DB59	Embedded charts exist separately	true	false			B
DB6	The chart which cannot exists as a separate entity are _____	freestanding	embedded	stand alone	sub chart	B
DB60	From ms - access, if we want to view the records stored in a table in ms - excel worksheet, we need to	use hyperlink	use import	use datasheet in forms	use export	D
DB61	Page header is present at the beginning of each record	true	false			B
DB62	Detail section has a header and footer	true	false			B
DB63	A macro is performed only when the user initiates an event	true	false			B
DB64	The macro is selected from the action field of a macro sheet	true	false			A
DB65	A macro can be made to execute before the starting of a database	true	false			A
DB66	In MS-Access. While appending records, the source and the target table must have similar structure and fields	true	false			A
DB67	We can add our own functions to the expression elements list box of the expression builder	true	false			A
DB68	_____is the wildcard character which represents the presence of any number of characters	&	#	?	*	D
DB69	Macros can be used to add a menu to a database object	true	false			A
DB7	_____ header is a unique feature of reports	page	detail	group	topic	C
DB70	Chart can either be a form or a report	true	false			A
DB71	Group header will be present at the design view of a report even if the report is not grouped	true	false			B

ID	Question	A	B	C	D	Ans
DB72	We can change from the design view to the form view without being prompted for saving the changes made	true	false			A
DB73	Charts can be produced without the wizard	true	false			B
DB74	Macros can be used to create user defined error messages	true	false			A
DB75	Between and Not Between is _____ type of operators	relational	list	range	logical	C
DB76	The default data type of VB is integer	true	false			B
DB77	Visual Basic is based on _____	action language	structured query language	event - procedural based language	none of the above	C
DB78	_____is the name of the database object that displays data and can be used to edit data	report	form	query	table	B
DB79	In access OLE objects cannot be linked	true	false			B
DB8	_____ section is present for each record in the report	group	record	session	detail	D
DB80	A _____ sheet lists all the properties that pertain to the form or the controls	data	property	both a and b	none of the above	B
DB81	Textboxes can also be an example of unbound control	true	false			A
DB82	In MS-Access, we may design command buttons for navigating records	true	false			A
DB83	_____are forms that are included in other forms	sub forms	child forms	inner form	none of the above	A
DB84	_____ are used to represent our data in graphical format	graphs	chart	labels	report	B
DB85	A field with a _____ uniquely identifies each record	number	primary key	index	identifier	B
DB86	Large amount of data can be summarized using _____ tables	pivot	create	form	none of the above	A
DB87	_____ are employed to select only some particular records from a database object	filters	queries	sorts	forms	A
DB88	_____ control need not have a data source	form	bound	unbound	none of the above	C
DB89	_____ control combines the functionality of both a text box and a drop down list	list box	combo box	button	option button	B
DB9	MS access is a DBMS	true	false			A
DB90	A form can be bind to a record source using _____ property of the form	form name	control	record source	none of the above	C
DB91	_____ forms displays field in single row	tabular form	chart form	data sheet form	none of the above	A
DB92	_____ forms are usually used for tables with one to many relationship	sub forms	tabular form	columnar form	none of the above	A

DB93	_____ control uses an expression as a source of control	calculated	bound	unbound	none of the above	A
DB94	_____ control is tied to field	calculated	unbound	bound	static	C
DB95	_____is the form that can be created with minimum input from the user	sub form	auto form	tabular form	columnar form	B
DB96	_____option from the tool menu is selected for setting relationships between tables	set relation	connect	relationships	none of the above	C
DB97	_____,_____and_____are the buttons belonging to the	option, toggle and command buttons	command button, check and list boxes	list, check and combo boxes	option button, toggle button and check boxes	D
	options group					
DB98	_____allows us to create a filter from a field short cut menu	filter by form	filter by report	filter by record	filter by input	D
DB99	_____is a database object which displays data but cannot be used to edit data	form	report	macro	table	B
DS1	_____ means the result of applying to specific information certain specific technical processes.	Digital Sign	Digital Certificate	Digital Signature	None of the above	C
DS10	_____ is an algorithm which creates a digital representation or "fingerprint" in the form of a "hash result".	Hash Function	Digital Signature	Digital Certificate	Private Key	A
DS11	_____ is of standard length which is usually much smaller than the message but nevertheless substantially unique to it.	Hash Function	Hash Value	Hash Result	Either B or C	D
DS12	Digital Signature involves two processes. They are _____ and _____.	Digital Signature creation	Digital Signature Verification	Both A and B	Either A or B	C
DS13	The Costs of Digital Signature consists mainly of the following	Institutional Overhead and Subscriber Relying Party Cost	Subscriber Relying Party Cost	Institutional Overhead	None of the above	A
DS14	CA stands for _____	Certification Authority	Certified Authority	Certificate Authority	None of the above	A
DS15	A Digital Certificate is issued by a Certification Authority and is signed with the CA's Private Key	True	False			A
DS16	A Digital Certificate does contain Owner's Public Key, Owner's name, Expiration date of the Private Key, Serial number of the digital certificate	True	False			B

Ph.- 9253868698

ID	Question	A	B	C	D	Ans
DS17	_____ enable web servers to operate in a secure mode.	Server Certificate	Developer Certificate	Personal Digital Certificate	None of the above	A
DS18	_____ are used by individuals when they exchange messages with other users or online services.	Server Certificate	Developer Certificate	Personal Digital certificate	None of the above	C
DS19	_____ are on-line databases of certificates and other information available for retrieval and use in verifying digital signatures.	Private Certificate	Repositories	Public Key	none of the above	B
DS2	**Signing Writings serve the following general purposes_____,_____,_____ and _____**	Evidence, Ceremony, Approval	Approval, Evidence	Efficiency and logistics, Evidence	Evidence, Ceremony, Approval, Efficiency and Logistics	D
DS20	**The most widely accepted format for Digital Certificate is defined by the CCITT X.509**	True	False			A
DS21	**A certificate may prove to be unreliable, such as in situations where the subscriber misrepresents his identity to the certification authority**	True	False			A
DS22	**CRL stands for**	Certificate Revocation List	Certificate Resource List	certificate Revocation Letter	None Of The Above	A
DS23	**The prospective signer identified in the digital certificate holds the_____ and is called the _____**	Private Key, Subscriber	Public key, Recipient	Private Key, Recipient	None Of The Above	A
DS24	**A "recipient" of the certificate desiring to rely upon a Digital Signature created by the subscriber named in the certificate is called the _____**	Recipient Party	Relying Party	Either A or B	Neither A nor B	B
DS25	**The Relying Party can use the _____ listed in the certificate to verify that the digital signature was created with the corresponding _____**	Public Key	Private Key	Both A and B	Both B and A	C
DS26	**Digital Signatures are used for a variety of Electronic Transactions like _____**	E-mail	Electronic Commerce	Electronic Fund Transfers	All The Above	D
DS27	**To associate with a key pair with a prospective signer, a Certification Authority issues Digital Certificate**	Not False	Not True			A
DS28	**Digital Signatures, if properly implemented and utilized offer promising solutions to the problems of Imposters, Message Integrity, _____ and _____**	Closed System,Formal Legal requirements	Formal Legal Requirements	Open System	Formal Legal Requirements, Open System	D

ID	Question	A	B	C	D	Ans
DS29	In, Digital Signature, _____ perform the "ceremonial" function of alerting the signer to the fact that the signer is consummating a transaction with legal consequences	Affirmative Act	Efficiency	Signer authentication	None of the above	A
DS3	A Digital Signature must have the following attributes _____ and _____	Signer Authentication	Document Authentication	Both A and B	Neither A nor B	C
DS30	"Hash Function" is used in both creating and verifying Digital Signature	Not True	Not False			B
DS4	_____ provides assurance of the origin or delivery of data in order to protect the sender against false denial by the recipient that the data has been received, or to protect the recipient against false denial by the sender that the data was sent.	Nonrepudiation Service	Digital signature	Digital certificate	Private Key	A
DS5	_____ serves the ceremonial and approval functions of a signature and establishes the sense of having legally consummated a transaction.	Affirmative Act	Efficiency	Either A or B	Neither A nor B.	A
DS6	_____ is a branch of applied mathematics concerns itself with transforming messages into seemingly unintelligible forms and back again.	Cryptography	Public Key	Private Key	None of the above	A
DS7	The complementary keys of an asymmetric cryptosystem for Digital Signatures are arbitarily termed as _____, and _____	Private Key	Public Key	Both A and B	Either A or B	C
DS8	_____ is known only to the signer and is used to create the digital signature.	Private Key	Public Key	Both A and B	Either A or B	A
DS9	_____ is ordinarily more widely known and is used by a relying party to verify the digital signature.	Private Key	Public Key	Both A and B	Either A or B	B
EC1	The acronym for B2B is _____	Business-to-Business	Business-to-Backend	Backend-to-Business	Business-to-Billboard	A
EC10	The _____ model is the least intrusive model but requires active search on the part of the customer	Billboard	On-line Catalog	Endorsements	Broadcast	B
EC11	_____ is / are a form of advertisement where people relate their experience with products and services	Customer Endorsements	Billboard	Catalog	Broadcast	A
EC12	The _____ are software agents who communicate with the business merchants on behalf of the customers	Intermediaries	portals	.COM	Domains	A
EC13	The Pre-purchase preparation phase includes _____ for a set of products	Order Placement	Service	Search and discovery	None of the above	C
EC14	The _____ phase includes customer service and support to address customer complaints , product returns and products defects	Post purchase interaction	Purchase consummation	Pre-purchase preparation	Search and discovery	A

Ph.- 9253868698

Code	Question	A	B	C	D	Ans
EC15	The _____ allow companies to bypass the need for costly printed catalogs	Billboard model of marketing	Online catalog	Endorsement model of marketing	None of the above	B
EC16	A _____ is a basket on the Net that is used to place the items that are being purchased	Online Catalog	Shopping cart	Billboard	Pulling cart	B
EC17	EDIFACT is an abbreviation of _____	EDI For Administration, Commerce and Transaction	EDI For Administration, Consumer and Transport	EDI For Administration, Commerce and Transport	None of the above	C
EC18	The _____ allows for protocol conversion and communicates with the bank using the banks private network or the Internet	EDI	TCP/IP	EFT	Gateway	D
EC19	In Ecommerce, data extraction, transforming the data into transmittable form, transmitting the data and downloading the data are the operations employed in _____	Compiler	Interpreter	Assembler	EDI	D
EC2	The _____ commerce assists in integrating the customers and suppliers of the company directly into the organisation	Business-to-Business	Business-to-Consumer	Consumer-to-Business	Customer-to-Company	B
EC20	E-cash means_____	Emergency Cash	Electronic Cash	Euro Cash	Endorsed Cash	B
EC21	E-commerce is a tool that addresses the desire of firms to cut services cost and improving the quality of goods. It is a definition of e-commerce from _____	Communication Perspective	Business Process Perspective	Service Perspective	None of the above	C
EC22	The small denomination digital tokens are called _____	Microcash	Micro Transactions	TT(Tiny token)	E-token	A
EC23	The _____ is the process of encoding information to prevent it from being read by unauthorized parties	Decryption	SSL	Encryption	Subscription	C
EC24	In EDI interface, the translation service receives _____ as incoming files from the communication service	Internal Format File	External Format File	Transmission File	None of the above	C
EC25	The EDI standardisation for International Trade and Commerce is introduced by _____	ANSI	UN/EBCDIC	UNESCO	UN/EDIFACT	D
EC26	In EDI, the transmission files are composed of different sets of external format files which are grouped into multiple sets under the name of _____	batch files	interchange sets	functions	functional groups	D
EC27	The _____ are pre-paid credit cards that include an embedded cards	Smart Card	Embedded cards	SET	None of the above	A

ID	Question	A	B	C	D	Ans
EC28	_____ are another form of credit payment that lets customers use digital online cheques to pay Web merchants directly	E-cash	Digital Cash	Smart Cards	Electronic cheques	D
EC29	In Active advertisement, there are two types of models. They are _____ and _____	Billboards and Junk Mail	Online Catalog and Billboards	Broadcast and Junk Mail	Online Catalog and Customer Endorsements	C
EC3	The network based technology is/are _____	EDI	E-mail	EFT	All of the above	D
EC30	Decryption is a process employed for scrambling of plain text for web based transactions	True	False			B
EC4	Asymmetric cryptosystem is based on _____ and _____	Login_Id and Password	Primary Key and Private Key	Public Key and Password	Public Key and Private Key	D
EC5	Value Added Network is an example of _____	Global Network	Private Network	Satellite Area Network	None of the above	B
EC6	The advertising strategies emerging in the on-line world are _____	Active or push based advertising	Passive or pull-based advertising	Glow sign or hoarding strategies	All of the above	D
EC7	The _____ model use direct mail, spot television or cable television, in active based advertisement.	Broadcast	Junk mail	Billboard	Endorsements	A
EC8	The _____ is a form of mail that is not targeted to a specific audience	E-mail	Bulk-mail	Direct-mail	Junk mail	D
EC9	The _____ model refers to information that is placed at a point where it will be noticed by customers in the course of other activities and does not require active search	Catalog	Endorsement	Billboard	Broadcast	C
EX1	The wizard that is used to import text files is_____	text import wizard	convert text to columns wizard	tip wizard	function wizard	A
EX10	The alphabet indicating the column followed by the row number is known an_____	cell reference	row reference	column reference	none of the above	A
EX11	Which of the following files could not be opened in excel _____	text files	Lotus 1-2-3	quattropro or xbase files	class files	D
EX12	In excel, the dates that are stored as sequential numbers known as _____-	serial values	domain values	range values	reference values	D
EX13	The command to display the current date in a cell is _____	=today()	=date()	=currentdate()	none of the above	A

Q	Question	A	B	C	D	Ans
EX14	In excel, absolute references are represented by a _____ before the column and row addresses	dollar sign	' = ' sign	# sign	none of the above	A
EX15	The _____ can be used to select the function and assemble the arguments correctly	AutoSum	AutoFill	function wizard	none of the above	C
EX16	Specific parts of information required by functions to perform certain tasks are called as_____	variables	arguments	parameters	none of the above	B
EX17	Which of the following do not belong to the formula category in excel environment_____	text	logical	numeric	Boolean	D
EX18	The function that in used to join cell values together in a single cell _____	concatenate	pmt	merge	none of the above	A
EX19	The function that is used to count all the values that meet specific criteria _____	countif	vlookup	pmt	count	A
EX2	The wizard that is used to create and edit charts _____	pivot table wizard	chart wizard	convert text to columns wizard	tip wizard	B
EX20	The function that is used to calculate the payment for specific loan terms _____	sumif	pmt	countif	none of the above	B
EX21	The function that is used to add together all values that meet specific criteria is known as _____	average	sum	sumif	countif	C
EX22	The _____ option present in the file menu options is used to specify major facts of the page to be printed	page setup	print area	print	none of the above	A
EX23	The command that is used to apply a format automatically _____	autoformat	AutoFill	none of the above		A
EX24	The _____ makes the information in a worksheet meaningful and easy to understand	bordering	formatting	shading	none of the above	B
EX25	A particular part of a work sheet can be printed by setting the _____	page setup	print area	print	print preview	B
EX26	The process of finding or selecting information is known as _____	filtering	searching	sorting	none of the above	A
EX27	The option that is used to cancel the filter process for a specific column and display all the records is _____	all option	blanks	all blanks	none	A
EX28	There are _____ types of data tables	1	2	3	4	B
EX29	The tables that allows the user to change or rearrange the data, summarize the data and evaluate the data using changing points of view is known as	data table	filtered table	index table	pivot table	D
EX3	The wizard that is used to suggest hints for doing a task	pivot table wizard	chart wizard	convert text to columns wizard	tip wizard	D
EX30	In a chart Y-axis is known as_____	series or rank	category	legend	data marker	A
EX31	In a chart X-axis is known as_____	series or rank	category	legend	data marker	B

Code	Question	Option A	Option B	Option C	Option D	Ans
EX32	_____ is a set of tables that describe each of the data series	series or rank	category	legend	data marker	C
EX33	_____ is used to differentiate one data series from another	series or rank	category	legend	data marker	D
EX34	The chart that contains only one data series is _____	column chart	bar chart	pie chart	surface chart	C
EX35	The chart that holds the column chart is _____	column chart	bar chart	pie chart	surface chart	B
EX36	The chart that display two or more data series on a surface is _____	column chart	bar chart	pie chart	surface chart	D
EX37	The chart that is used to display discrete data	column chart	bar chart	pie chart	surface chart	A
EX38	_____ are not allowed in a macro name	spaces	wild card characters	symbols	none of the above	A
EX39	Which of the following tool cannot be used to view the excel web page_____	excel97	internet explorer	Netscape	word 2000	A
EX4	The wizard that used to build an interactive table from data existing on sheets	pivot table wizard	chart wizard	convert text to columns wizard	tip wizard	A
EX40	The chart that is used for displaying stock market information	line chart	bar chart	stock chart	pie chart	C
EX41	In excel, the subtotal command also generates grand total after the last group subtotal_____	true	false			A
EX42	In advanced filter , the criteria occupying multiple columns but more than one row, is considered as an _____ criteria.	and	or			B
EX43	The stacked bar graphs can be represented in _____	3-dimensions	4-dimensions	Multi-dimensions		A
EX44	A pie chart can represent only one data series at a time	true	false			A
EX45	The _____ generates a summarized report in tabular form in an interactive manner	Data table	Pivot table			B
EX46	Which one of the following statements related to stock chart is NOT TRUE ?	It is also called as high-low-close chart	It shows trends over time	It is often used to display share market prices over a period of time	It is also used for indicating fluctuations in temperature changes	B
EX47	The state government needs to finalize a five years plan to implement 100% literacy in the state. Which one of the following will be the best tool that should be used to work out the plan ?	Pivot table	Scenario manager	Solver	Data table.	C

ID	Question	A	B	C	D	Ans
EX48	Forecast'99 is a group working on exit poll. It wants to know how many seat ABC party needs to won in totality to obtain majority to form the government. Which one of the following will be the tool that will help the team ?	Goal seek	Scenario manager	Pivot table	Data table.	A
EX49	Which one of the following will be the tool that provides a way to view and compare the results of all the different variations together on the worksheet ?	Goal seek	Pivot table	Solver	Data table.	D
EX5	A _____ is an excel file where the user stores his data	Workbook	Worksheet	Spreadsheet	none of the above	A
EX50	Spreadsheets are useful for _____	Performing calculations.	Performing database operations	Performing text formatting.	All of the above	D
EX51	Which one of the following is NOT the component of the pivot table ?	Column field	Row field.	Source table name.	Pivot table item.	C
EX52	Excel allows upto _____ levels of sorting	two	three	N		B
EX53	Filtering rearranges a list to display the required records	true	false			B
EX54	The stacked bar graphs can be represented in _____	3-dimensions	4-dimensions	Multi-dimensions		A
EX55	The _____ generates a summarised report in tabular form in an interactive manner	Data table	Pivot table			B
EX56	Which one of the following statements related to stacked bar chart is NOT TRUE ?	It displays the data series one on top of the other.	It is useful when several components are changing and the user is interested in the sum of the components.	It can be represented in 3-dimensions		B
EX57	The state government needs to finalize a five years plan to implement 100% literacy in the state. Which one of the following will be the best tool that should be used to work out the plan ?	Pivot table.	Scenario manager	Solver	Data table	C
EX58	Forecast'99 is a group working on exit poll. It wants to know how many seat ABC party needs to won in totality to obtain majority to form the government. Which one of the following will be the tool that will help the team ?	Goal seek	Scenario manager	Pivot table	Data table	A
EX59	Which following function is used in subtotal option ?_____	Count.	Standard deviation	SumIf		A
EX6	A workbook consists of many _____	databases	records	tables	worksheets	D

EX60	Which two of the following statements related to pivot table are TRUE ?	It is a tool for summarizing and analyzing the data records in an interactive manner.	It is a tool that provides a way to view and compare the results of all the different variations together on the worksheet	It summarizes the data by using analytical functions.		A
EX61	Which one of the following is NOT a What-if analysis tool ?	Goal seek.	Scenario manager	solver	Pivot table	D
EX7	The _____ wizard separates contents in a cell into different cells	text import wizard	convert text to columns wizard	tip wizard	function wizard	B
EX8	A spreadsheet is a grid of rows and columns and is called as a _____	worksheet	workbook	tables	database	A
EX9	Pick out the window that is not a form of excel _____	application window	document window	modal window		C
IN1	The World Wide Web was devised by _____	CERN	ECRN	CARN	NET	A
IN10	The useful URL schemes are_____ and_____	yahoo and infoseek	mailto and files	newsgroups and search engines	none of the above	B
IN100	The other ways of getting connected to the net are_____	news groups,yahoo and infoseek	bulletin boards,mails call and wireless system	application servers,proxy servers and web servers	none of the above	B
IN101	BBS stands for_____	bulletin board system	business broadcasting system	bulletin broadcasting system	none of the above	A
IN102	USENET is a BBS on ____ scale	small	large	very small	none of the above	B
IN103	WINSOCKS is expanded as_____	windows socks	windows sockets	windows stocks	none of the above	B
IN104	IETF Level 2 HTML DTD supports graphical browsers like _____	Mosaic	Yahoo	PINE	Lynx	A
IN105	The space used by Netscape to store the retrieved page is called_____	buffer	cache	built-in	none of the above	B
IN106	The URL for encyclopedia Britannica is_____	www.ency.in	www.eb.com	www.encybrit.com	none of the above	B
IN107	_____ maps IP addresses with the domain names of the sites	URL	DNS	FTP	none of the above	B

ID	Question	A	B	C	D	Ans
IN108	Internet can be defined as _____	internal network	network of network	intermediate network	none of the above	B
IN109	The most important service of the _____ is to manage traffic control	application layer	transport layer	physical layer	session layer	D
IN11	_____is a program that displays information about a host connected to the net	finger service	ping service	ftp service	none of the above	A
IN110	_____ is a program or a tool that helps in locating a file anywhere on the net	FTP	TELNET	ARCHIE	none of the above	C
IN111	URL stands for _____	uniform research locator	uniform resource locator	unlimited restore locator	none of the above	A
IN112	IN an URL the word before the color refers to _____	host computer	name of the resource	scheme	none of the above	C
IN113	A _____ always begins with a slash	message	scheme	command line	none of the above	C
IN114	Prodigy is run by IBM and _____	Delphi	Microsoft	sears	general electric	C
IN115	The World Wide Web is referred to shortly as the _____	net	web	browser	editor	B
IN116	Gopher and WAIS enables the user to _____	browser	read the Usenet news	search for database	none of the above	C
IN117	_____ is the program used to run CompuServe's regular services	CompuServe internet dialer	spy mosaic	wincim or maccim	none of the above	C
IN118	Navigating through the menu of gopher is called moving around _____	gophering	gopherspace	cyberspace	none of the above	C
IN119	The directories that come with built-in engines are yahoo,lycos and _____	Alta vista	open text	excite	none of the above	B
IN12	To use the finger command,SLIP users must run a programme called_____	finger server	ftp server	web server	none of the above	A
IN120	The web maps are called _____	list	directories	image list	none of the above	C
IN121	Directories consists of _____ levels	no	maximum of five	one	many	B
IN122	The _____ level gives the broadcast overview of the net	middle	lower	top	middle and lower	D
IN123	The huge list of keywords from important items is called _____	hotlist	directory	index	glossary	C
IN124	The two types of search in veronica are _____ and _____	directory search,index search	index search,menu search	menu search,item search	item search,index search	C
IN125	_____ searches by keywords	infoseek	excite	lycos	all the above	D
IN126	Mosaic displays links in color whereas _____ does not display links in color	netshark	cello	lynx	all the above	C

IN127	_____ supports one button publish	lynx	mosaic	Lycos	navigator gold 2.0	C
IN128	SPY MOSAIC is distributed by_____	Microsoft	internet	IBM	CompuServe	D
IN129	_____ is a program that helps us to log on to other networks	Usenet	finger service	ftp	telnet	D
IN13	HTTP is the acronym for _____	Higher text transfer protocol	Hyper text transmission port	Hyper text transfer protocol	Hyper text transfer port	C
IN14	_____is used to transfer and copy files over the internet	iccp	ftp	uucp	none of the above	C
IN15	_____ is a program that helps us to log on to other networks	yahoo	ftp	telnet	none of the above	C
IN16	TCP/IP stands for _____	transfer control protocol/internet	transmission control protocol/internet protocol	transfer communication protocol/internet protocol	none of the above	B
IN17	Archie servers can be accessed in_____ different ways in internet	one	two	three	none of the above	C
IN18	_____is the computer on the internet that translates between the internet domain names and the internet numeric address	ftp servers	domain name servers	web servers	none of the above	B
IN19	TIA stands for_____ in internet	the internet adapter	the internet administration	the internet access	none of the above	A
IN2	Service indicates the name of the _____ used to access data, present on the other end of the link.	browser	protocol	site	organization	B
IN20	HTTP stands for_____	hotlink text transfer protocol	hyper text transfer protocol	higher type transfer protocol	none of the above	B
IN21	_____ is used to link pages in the world wide web	universal resource locator	uniform resource locator	uniform resource label	name of the above	B
IN22	FAQ stands for _____	frequent asked query	frequently asked question	frantically asked question	none of the above	B
IN23	The internet adapter is a programme that makes our connection act like a _____or a _____ account	SLIP,PPP	TCP,IP	IP,UDP	none of the above	A
IN24	The step involved in Communicating between the web clients and servers is _____	connection	response	request	close	A
IN25	WSIRC stands for_____	wide search for information and research	windows sockets internets relay chat	world search for information and research council	none of the above	B

ID	Question	A	B	C	D	Ans
IN26	**Two of the important browsers are_____ and_____**	lynx,minx	netscape,ie	mosaic,gopher	none of the above	B
IN27	**Lynx is a _____ programme that works with terminals**	world wide web server	world wide web client	interface	none of the above	B
IN28	**The huge list of keywords from important items is called an_____**	glossary	index	hotwords	none of the above	B
IN29	**VERONICA is an acronym for _____**	very easy and rodent oriented net wide index to computerized archives	very organised network integration and communication application	verification on network integration and communication	none of the above	A
IN3	**The first freenet is created at the_____ and is called_____**	university of berkeley,berkeley freenet	university of cleveland,cleveland freenet	university of California net	none of the above	B
IN30	**_____ are defined as ways of communication amongst networks**	protocols	IP address	dns	none of the above	A
IN31	**_____and_____ are web searching features**	search engines,directories	ftp and finger	telnet and ftp	none of the above	A
IN32	**WINWAIS has two source lists namely____ and_____**	allsrc,winsocks	wais,allsrc	wais,winsocks	none of the above	B
IN33	**_____ is also called as WAIS manager**	allsrc	waisman	winsock	none of the above	B
IN34	**HTML stands for_____**	higher text medium language	hyper transfer markup language	hyper text markup language	none of the above	C
IN35	**The system of interlinked documents is known as_____**	hot links	hyper text	books marks	none of the above	B
IN36	**The small programmes that create animation,multimedia,real-time games and multi user games are called_____**	images	applets	animation	none of the above	B
IN37	**The information displayed on the web page includes_____,_____ and_____**	graphics,videos,audio	programms,images,text	animation,scripts,executables	none of the above	A
IN38	**The web pages that represent online home of their author are called_____**	first page	home page	welcome page	none of the above	B
IN39	**GNN stands for_____**	global network news	global networks navigator	grand network news	none of the above	B
IN4	**_____ is the most popular internet service**	yahoo service	electronic mail	search engines	none of the above	B

IN40	**The online service offered by navigator gold 2.0 are _____ and_____**	email and net conference	Netscape page starter site,netscape page wizard	yahoo and altavista	none of the above	B
IN41	**_____ is a program or a tool that helps us find a file anywhere on the net**	newsgroup	telnet	ftp	archive	D
IN42	**The databases to enable keyword search using Lycos are a2z,_____**	Lycos catalog	point review	all the above	none of the above	D
IN43	**_____ is a large worldwide bulletin board service network**	apple link	bitnet	Delphi	fidonet	A
IN44	**BABEL consists a glossary of _____**	computer related abbreviations and acronym	biographical information	bookstores	none the above	D
IN45	**Dictionaries,encyclopaedias,government and other references are found in _____**	encyclopedia Britannica	on-line reference works	more information	galenet	A
IN46	**Yahoo,lycos,excite and webcrawlers are _____**	search engines	web directories	database	channel	B
IN47	**GIF is the acronym for _____**	Graphical interpreter formatting	Graphical interchange Format	Graphical interface format	Graphical Interface format	B
IN48	**JPEG is the acronym for _____**	Joint Pictures Expert Group	Jumbled pictures expert graph	Joint pictures expert graph	Joint pictures experimental group	A
IN49	**The Web aids users to explore the _____**	mails	documents	net	browsers	C
IN5	**The three most popular mailer are_____,_____ and_____**	yahoo,infoseek,altavista	netscape,ie,lynx	eudora,netscape and pine	none of the above	C
IN50	**The World Wide Web consists of _____**	information	web pages	network connections	mails	B
IN51	**In Microsoft Internet Explorer, the color of the text can be specified using _____ attribute of the font tag.**	BACKGROUND	COLOR	FCOLOR	FONTCOLOR	B
IN52	**The interface that provides effective communication between the web browsers and servers is _____**	Communication gateway interface	Common graphical Interface	Communication graphical interface	Common Gateway Interface	D
IN53	**CGI is the _____ between web browsers and servers**	Network	Interface	Communication	Connection	B
IN54	**CGI programs are invoked based on the information provided by the _____**	Current web page	Browser	Client	None of the above	B
IN55	**A CGI program is usually called after a request made by the _____**	Browser/user	Server	Web	Channel	A

ID	Question	A	B	C	D	Ans
IN56	URL stands for _____	Unknown resonance language	Uniform resource locator	United relay limited	None of the above	B
IN57	A hyperlink can be on _____	text only	image only	text or image	neither text nor image	C
IN58	HTML was derived from _____	SQL	PLSQL	SGML	CGI	C
IN59	SGML is a _____	alphalanguage	betalanguage	metalanguage	none of the above	C
IN6	PINE stands for _____	palm is not eatable	palm is not elm	pancake is not edible	none of the above	B
IN60	The application that confirms whether a document is compliant to its DTD is _____	SGML Processor	SGML Preprocessor	SGML Parser	SGML Composer	C
IN61	Web is a collection of _____	web sites	images	applets	documents	A
IN62	IETF stands for _____	Internet equipment training faculty	International Engineering trainers and faculty	Internet Engineering Task Force	None of the above	C
IN63	The two major browsers used to surf the Internet are _____,_____	MS Internet Explorer and Mosaic	Netscape Navigator and Mosaic	MS Internet Explorer and Netscape Navigator	None of the above	C
IN64	Special characters allow browsers to display _____	text	data from a database	symbols	video	C
IN65	The keyword for providing links within or across documents is_____	hyperlink	hypertext	hotword	hotlink	B
IN66	Stringing pages together using hypertext technology helps view pages _____	in random order	in sequential order	in user-defined order	none of the above	B
IN67	The initial web pages present in a web site is the _____ page.	first	start	home	none of the above	C
IN68	The image format supported by most browsers is_____.	.bmp and .gif	.bmp and .jpeg	.gif and .jpeg	.wmf and .bmp	C
IN69	The components of a URL are _____	Service, hostname and directory path	service,hostname,port,directory-path	service,port and directory path	service,hostname and port	B
IN7	The mail we send has a mailing address and most of them correspond to_____,_____ and	mail servers,mail clients and alternate services	mail vendors,mail identification and password	mailing lists,mail server robots and gateways to other services	none of the above	C

ID	Question	A	B	C	D	Ans
IN70	Which of the following is not supported by internet explorer _____	<center>	<font size=n>	<hr size=n>	<l1 type=shape>	D
IN71	CGI stands for _____	communication generated information	common gateway interface	classified general instructions	none of the above	B
IN72	Host name indicates the domain name of the web _____	Server	Client	Browser	User	A
IN73	The internet is also called as _____	arpanet	the net	intranet	none of the above	B
IN74	The internet is similar to _____	LAN	peer-to-peer connectivity	wan	none of the above	B
IN75	The net drivers_____ from one place to another	data	parcel	packets	none of the above	A
IN76	The net provides interesting services like_____,_____ and_____	scripting,parsing and compiling	news,cooking and fine arts	email,file retrived,internet tools	none of the above	C
IN77	The windows internet software available are_____,_____,_____ and_____	nt,windows95,ie, winzip	mosaic,gopher,e udora,trumpnet	communicator,ie ,lynx,winsock	all of the above	B
IN78	_____ is the ancestors of the internet	dnet	arpanet	ARPANET	none of the above	B
IN79	DARPA stands for _____	defensive administrative rank administration network	dedicated and registered projects administration	defensive advanced research projects administration net	none of the above	C
IN8	The uuencode files start with a _____	start	begin	first	none of the above	B
IN80	DARPA is broken into _____ and _____	milnet,smaller arpanet	mailnet,inet	intranet,extranet	none of the above	A
IN81	NSFNET is the united states provides service to _____ and_____	education,resear ch	music and dance	cooking and dining	none of the above	A
IN82	HTML stands for _____	Higher text manipulation language	Hotlink text markup language	Hyper transfer meta language	Hyper text markup Language	D
IN83	The first international IP network connections were established in 1973 with _____ and_____	united states and UK	england,norway	united states & Russia	none of the above	B
IN84	A_____ is a set of computers interconnected by transmission paths to exchange information in internet	server	client	network	none of the above	C

ID	Question	A	B	C	D	Ans
IN85	A computer that provides a service usable by other computers is called_____	client	stand-alone	servers	none of the above	C
IN86	A_____ is the representation of physical connectivity of the computers in internet	network card	network topology	network redirectors	none of the above	B
IN87	DTE stands for _____	detailed transaction explanation	data terminal equipment	data target equipment	none of the above	B
IN88	The basic function of the _____ is transmitting the bits over a channel	application layer	physical layer	network layer	none of the above	B
IN89	The point to point channel network is also called as _____ and_____	point to point network and broadcast channel network	packet switching,store and forward network	smart network and dumb network	none of the above	B
IN9	Accessing files using FTP servers is called_____	file access	anonymous ftp	file transfer	none of the above	B
IN90	The three most commonly used networks are_____,_____ and_____	PAN,NAN,AAN	KAN,RAN,VAN	LAN,WAN,MAN	none of the above	C
IN91	_____ is in between LAN and WAN	VAN	MAN	TAN	none of the above	B
IN92	_____ can be owed by multiple organisation	LAN	MAN	WAN	none of the above	C
IN93	Data is transmitted in the form of_____ signals	analog	digital	non-digital	none of the above	B
IN94	DTD stands for _____	Data type definition	Define type of data	Document type definition	Document type data	C
IN95	Modem stands for _____	Moralize/demoralize	Modulation/demodulation	Manipulate/demanipulate	none of the above	B
IN96	_____ is the process of the digital signals being converted into a form suitable for analog transmission	Mapping	Modulation	Manipulation	none of the above	B
IN97	_____ and_____ are two basic ways of getting connected to the internet	Satellite link and digital signals	Dedicated access and dial up access	Cable and wires	none of the above	B
IN98	SLIP stands for _____	Standard long internet protocol	Stream line internet protocol	Serial line protocol	none of the above	C
IN99	PPP stands for _____	Prime prolonged protocol	Point to point protocol	Pillar to pillar protocol	none of the above	B
PP1	In Powerpoint2000 ,the built-in professional design elements are	clipart & auto shapes	autolayouts and presentation templates	slide view & outline view	none of the above	B
PP10	Selection handles are the 8 small _____ that appear around the object, when an object is selected	circles	points	squares	icons	C

PP11	The _____ is an invisible matrix of vertical and horizontal lines that covers the entire slide workspace	square	image	grid	guide	C
PP12	_____ are drop-down menus that appear when the right mouse button is clicked on the screen element	tool bars	short cut menus	auto shapes	all the above	B
PP13	_____ and _____ have the ability to add a lot of visual impact into the PowerPoint presentation	clip gallery & word art	slide show & view show	fonts & images	none the above	A
PP14	_____ is a motion picture or any animation file	wave file	media clip	.video file	all the above	B
PP15	The user can use _____ to remove the undesirable part of the image	clipping tool	cropping tool	cutting tool	scribble drawing tool	A
PP16	The power presentation has a _____ for a set of compatible colors	color palette	color box	color scheme	color guide	C
PP17	The set three colors used for graphs and for secondary slide items is called as	ascent	tricolor scheme	color palette	primary color scheme	A
PP18	There are _____ types of charts available in PowerPoint	10	28	18	36	C
PP19	_____ charts are useful while showing variations over a period of time	column	bar	pie	linear	A
PP2	_____ are the individual pages of a presentation	images	images and text	slides	slide sorter views	C
PP20	A PIE Chart is a ____ diagram that depicts the relationship between a whole and its parts	circular	radar	doughnut	all the above	A
PP21	Each individual piece of data in a series is called a/an	entity	data point	data	stream	B
PP22	PowerPoint launches an OLE-compatible application called	Microsoft organization chart	clip art	auto shapes	track changes	A
PP23	When the user double-clicks on an organization chart object in PowerPoint	the organization chart is expanded	the chart is made available for editing	the chart window opens displaying a chart template	none of the above	C
PP24	The _____ are used for selecting, editing and viewing objects in the chart	box tools	general purpose tools	custom drawing tools	standard drawing tools	C
PP25	Manager box tool in organizational chart window is	used to mange organizational chart	accessed only by manager	used to create a manager box for an existing box	used to store the other tools of the organizational chart	C

Code	Question	A	B	C	D	Ans
PP26	The custom drawing tools are _____ by default	turned on	turned off	not available in the tool bar	available in the tool bar	B
PP27	Click on the box tool _____ to draw three boxes	once	twice	thrice	any of the above	C
PP28	There are ____ default fields available in all boxes of the organizational chart	two	four	five	eight	B
PP29	The _____ tool is used in the same way as we use a pen to draw a table	native tool	draw tool	standard tool	all the above	B
PP3	A/An _____ consists of smaller printed version of the slides	autolayouts	handlayouts	slide view	none of these	B
PP30	The size of the object can be changed using the _____ tool	zoom	reduce/enlarge	preview	none of the above	B
PP31	_____ is the process through which the slides in the current presentation are included in another presentation or application	importing	exporting	copying	moving	B
PP32	_____ can be used to create charts as well as worksheets	Microsoft excel	auto shapes	clip art	drawing tools	A
PP33	PowerPoint can import text files that have been saved in _____ format	.ppt(PowerPoint)	.rtf(rich text format)	.doc(document)	.html(hypertext format)	B
PP34	PowerPoint outlines can have _____ outline levels	nine	only one	six	twelve	C
PP35	When a file is saved with _____ extension, the graphics and text are also saved along with the slide	.rtf(rich text format)	.wmf(windows metafile)	.txt(plain text)	.doc(document)	B
PP36	The hidden slide is	not displayed during the slide show	displayed only during the slide show	displayed only in outline view	none of the above	A
PP37	____ effect is used to introduce a slide during a slide show	DTS(digital track sound)	3D(3 dimension)	both a and b	transition	D
PP38	A _____ is a special effect that determines how the objects appear on the slide	build	transition	slide show	view show	A
PP39	The notes page is formatted based on the	notes master	slide master	master slide	master notes	A
PP4	Pick the odd man out of the following	outline view	slide view	view show	slide sorter view	C
PP40	When a new presentation is opened ,powerpoint creates slides that have a width of _____ and a height of _____ with the landscape orientation	15 inches,10 inches	10 inches,7.5 inches	7.5 inches,5 inches	none the above	B
PP41	The default orientation for notes ,handouts and outlines is ____ orientation	portrait	landscape	a or b	none of the above	A
PP42	Build effect is also called as _____	animation	view show	transition	b or c	A

ID	Question	A	B	C	D	Ans
PP43	Graphics for web pages are automatically stored in _____ format	gif	jpeg	png	none of the above	D
PP44	A _____ is used to jump to any slide in the presentation	hyperlink	hypertext	action button	all the above	D
PP45	The _____ language has been incorporated into PowerPoint	visual c++	visual basic for application	Microsoft visual interdev	all the above	B
PP46	In PowerPoint _____ is a series of commands that are executed in sequence	macro	batch file	templates	add-ins	A
PP47	The macro will be activated	while creating a .exe file	during slide transition	when the slide show is run	none of the above	C
PP48	Developers can easily add _____ to PowerPoint 2000 by using the programming interface	virus checkers	spell checkers	header files	all the above	A
PP49	_____ determines the order in which order in which the slides will be displayed during the show	slide show	custom show	both a and b	none of the above	B
PP5	_____ is used to organize and develop the contents of a presentation	slide pane	notes pane	properties pane	outline pane	D
PP50	If we save the presentation file as a metafile, it can be opened using	internet explorer	paint shop pro	paint shop pro	power point 2000	D
PP51	With reference to autocontent wizard for creating a new presentation, which of the following statements are not true	PowerPoint creates a sample presentation to which user can add words and pictures	it is the quickest way to create a presentation	contains sample presentations for a variety of topics	provides suggested content and design	D
PP52	Which of the following statement is not TRUE	user can insert objects like clip-arts, pictures stored in a separate files to the slides	user can insert only pre-drawn, pre-colored graphic images reflected in a clip arts to the slides	user can insert picture to the master slide which gets reflected in all the slides using that master slide	user can insert picture to the title slide which gets reflected in all the slides using that title slide	B

PP53	With reference to changing the order of slides, which of the following statement is not true	in outline view, drag the slide icon to a new location	in slide sorter view, drag the slide to a new location	in notes pages view, drag the slide icon to a new location	I slide view, drag the slide icon to a new location	C
PP54	Which of the following definitions are not true	the slide that holds the formatted placeholders for the titles, main text and any background items that user wants to appear on the slides is called a master templates	transition means applying special effects to the crossover between the slides	design templates is the template whose format and color scheme user applies to a presentation	the slide that holds the formatted placeholders for the title and sub-title for the presentation is called a title template	D
PP55	Which of the following statements are not true	with notes pages view user can prepare speaker notes and handouts	in outline view, user can see the miniatures of all slides in a presentation, complete with text and graphics	user should select the slide view to add the text to the slide	the slides can be reordered in the outline view	B
PP56	Which of the following definitions are not true	the slide that holds the formatted placeholders for the titles, main text and any background items that user wants to appear on the slides is called a master template	transition means applying special effects to the crossover between the slides	design template is the template whose format and color scheme user applies to a presentation	the slide that holds the formatted placeholders for the title and subtitle for the presentation is called a title template	D

		A	B	C	D	Ans
PP57	The options available in the common task toolbar does not include	slide layout	customize	new slide	set up show	B
PP58	With reference to chart, which of the following statements are not true	data to be graphed resides in a datasheet window	by default, doughnut chart is displayed based on the data in the datasheet	data is plotted in a chart window	user can add data labels and gridlines to the chart	B
PP6	The format of the text entered in a title, subtitle, or bulleted-list object is determined by the format settings in a special slide called --------	the master slide	the slide master	the header slide	the format slide	B
PP7	PowerPoint provides a _____ that searches the entire presentation i.e., all the text objects in all the slides, outlines, notes and handouts for spelling errors	office assistant	spell checker	grammar checker	none of the above	B
PP8	PowerPoint's drawing toolbar contains _____ drawing tools	10	12	102	22	B
PP9	Click _____ on the rectangle drawing tools enables us to draw multiple rectangles	once	twice	three	four times	B
VB1	Microsoft visual basic project file has _____ file extension.	.vbg	.vbp	.frm	.frx	B
VB10	In visual basic, _____ method is used to add an item in a combobox	add	additem	loaditem	none of the above	B
VB11	In visual basic, _____ method is used to load picture during runtime in an image control	load	loadpicture	addpicture	none of the above	B
VB12	In visual basic, to populate a drive list box with a directory list box _____ statement is used	Drive1.Drive=Dir1.Path	Dir1.Path = Drive1.Drive	File1.Path = Dir1.Path	none of the above	B
VB13	In visual basic, to display a message in the run time _____ function is used	messagebox()	message()	msgbox()	none of the above	C
VB14	In visual basic, to populate a directory list box with a file list box _____ statement is used	Dir1.Path=File1.Path	Dir1.Path = Drive1.Drive	File1.Path = Dir1.Path	File1.pattern=Dir1.path	C
VB15	In visual basic, _____ is a property of a recordset object which counts the number of rows in a recordsourse object	openrecordset	opendatabase	recordcount	count	C
VB16	In visual basic, using a data control, a record can only be added from the last record. Adding a new record is only possible using _____ method of a recordset object.	update	append	addnew	additem	C
VB17	In visual basic, using a data control, a record is saved to a recordsource object using _____ method of a recordset object.	append	update	additem	addnew	B

		A	B	C	D	Ans
VB18	**In visual basic, using a data control, to navigate to the previous record _____ method of a recordset object is used.**	movenext	movelast	moveprevious	movefirst	C
VB19	**In visual basic, when a record pointer reaches to the last record, _____ property of a recordset object is automatically set to _____**	eof,false	movelast,true	movelast,false	eof,true	D
VB2	**In visual basic, the explorer view of a project is displayed in _____**	properties window	form layout window	toolbox	project explorer	D
VB20	**In visual basic, when a record pointer reaches to the first record, _____ property of a recordset object is automatically set to _____**	bof,false	movefirst,true	movefirst,false	bof,true	D
VB21	**In visual basic, _____ is a method to convert a string into integer.**	value()	int()	number()	val()	D
VB22	**In visual basic, in a shape control, a vb statement gives Shape1.Shape = 2. What type of shape should we get?**	circle	rectangle	square	oval	D
VB23	**In visual basic, a timer event is only available in timer control.**	true	false			A
VB24	**In visual basic, vbred or vbgreen or vbblue are the property values of a backcolor of any object**	true	false			A
VB25	**In visual basic, _____ is a property of a textbox control to set a color of a text.**	fontcolor	color	forecolor	none of the above	C
VB26	**In visual basic, _____ property of a textbox control is set to _____ to underline a text**	underline,true	fontunderline,true	textunderline,true	none of the above	B
VB27	**In visual basic, _____ property of a textbox control is used to change the size of text.**	textsize	size	foresize	fontsize	D
VB28	**In visual basic, the interval property of a timer control is given in _____**	one- millionth of a second	one-hundredth of a second	one-thousandth of a second	one-ten thousandth of a second	C
VB29	**In visual basic, _____ property of listbox control counts the number of items in the list**	count	recordcount	itemcount	listcount	D
VB3	**In visual basic, the properties of various controls can be set using _____**	form layout window	prperties window	project explorer	toolbox	B
VB30	**In visual basic, vbinformation, vbcritical, vbexclaimation are the values of _____ in a messagebox function.**	title	prompt	vbmsgboxstyle	none of the above	C
VB31	**In visual basic, _____ is a function which displays a message and it also allows the user to enter values in a form object**	msgbox()	textbox	label	inputbox()	D

Code	Question	A	B	C	D	Ans
VB32	In visual basic, using a data control, _____ is a recordset type which allows to add a new record and also to update existing record in a recordsourse object	opendynaset	opensnapshot	dbopensnapshot	dbopendynaset	D
VB33	In visual basic, while closing a form _____ event of a form object is triggered earlier to terminate event.	load	activate	unload	initialze	C
VB34	In visual basic, to give a backcolor or to bring in a picture to a command button can only be done if we set the style property to _____	standard	opaque	transparent	graphical	D
VB35	In visual basic, a method RGB(255,0,0) will generate _____ color	blue	red	green	black	B
VB36	In visual basic, a method RGB(255,255,255) will generate _____ color	red	green	blue	white	D
VB37	In visual basic, if a user uses a shortcut key ctrl+R _____ becomes visible.	properties window	form layout window	toolbox	project explorer window	D
VB38	In visual basic, if a user uses a function key F4 _____ becomes visible.	properties window	form layout window	toolbox	project explorer window	A
VB39	In visual basic, when a textbox control receives the focus _____ event is triggered.	change	lostfocus	text	gotfocus	D
VB4	In visual basic, a form is a _____ object.	child	parent	container	none of the above	C
VB40	Microsoft visual basic is a Rapid Application Development tool.	true	false			A
VB5	In visual basic, when a form object appears on the screen _____ event is triggered.	load	unload	initialize	activate	D
VB6	In visual basic, to display text on a label object _____ property is used	text	name	caption	none of the above	C
VB7	In visual basic, _____ object is used to access the database and also to manage the data in the database.	opendatabase	dbengine	openrecordset	none of the above	B
VB8	In visual basic, when a checkbox control is checked _____ property is automatically assigned with 1.	enabled	visible	value	style	C
VB9	In visual basic, _____ keyword is used to declare a variable	dime	dim	var	none of the above	B
WO1	_____ is a word processing that is a member of the office 2000 family	Word 2000	Office 2000	Office 97	Back Office	A
WO10	The feature that enables user to type anywhere in a document without pressing or tab	click-n-type	double click	drag & drop	none of the above	A
WO11	The_____ feature allows the user to copy and paste upto 12 items at the same time in an application	office clipboard	cut	select	none of the above	A

Code	Question	A	B	C	D	Ans
WO12	_____ and _____ key combination will extend the selection by one character on the left and right	shift+end and shift+home	shift+left and shift+right	ctr+end and ctr+home	none of the above	B
WO13	_____and_____ are improved layout in Word 2000	web layout, printlayout	normal layout, web layout	web layout, page layout	none of the above	A
WO14	The easiest way to create a document in word is	wizard	templates	click from start program, MSWord from the task menu	none of the above	A
WO15	In Office2000 environment the tool that makes work easier for us is_____	office assistant	inbox assistant	document assistant	none of the above	A
WO16	A short description of a tool bar button called the _____ is displayed when the mouse pointer is allowed to stay for a second on the button	Screen Tip	Tool Tip	Icon Tip	Document Tip	A
WO17	The _____ helps us to keep track of the margin of the page	tab stop	marginal stop	ruler	none of the above	B
WO18	The keys that are used to navigate between headers and footers are	up arrow keys only	page up keys only	home and end keys only	up and down arrow	D
WO19	Pick out the element from the following that dose not form the type of tabs for the Word 2000	left	center	decimal	rotation	D
WO2	_____are blueprints or patterns for documents of a certain type	template	model	dialogs/alerts	none of the above	B
WO20	The_____ is used for quickly setting paragraph indention using the mouse	increase indent	decrease indent	both A and B	none of the above	C
WO21	Word art is text with	special effect	control tool box	design wizard	pictures	A
WO22	AutoShapes in word can be created by accessing the _____	drawing toolbar	control box	database	forms	A
WO23	By default, a document consists of_____ section	1	2	0	11	A
WO24	The dialog box that is used to determine the documents margins is	page setup from the file	printer setup from the file menu	print preview from the file	none of the above	A
WO25	_____ is a box surrounding a page on all slides or a line that sets off a paragraph on one or more slides	border	shading	style box	none of the above	A
WO26	The key that is used to perform a task to select all t he text in the documents is	ctrl+a	Del	ctrl+f	ctrl+m	A
WO27	The key that is used to indent a paragraph is	ctrl+a	Del	ctrl+f	ctrl+m	D
WO28	The key that is used to change the font from the current positioned in a document is	CTRL+SHIFT+F	CTRL+O	CTRL+SHIFT+S	CTRL+SHIFT+P	A
WO29	The key that is used to change the style of the document that is from that normal to heading1 or heading1 to other document styles.	ctrl+shift+f	ctrl+o	ctrl+shift+s	ctrl+shift+p	C

WO3	_____ is the default view in Word used for typing Editing and Formatting the Text	NORMAL	ONLINE LAYOUT	PAGELAYOUT	ONLINE DOCUMENT	A
WO30	**The short-cut-key that is used to indent a paragraph spacing in the documents is**	ctrl+m	ctrl+2	ctrl+end	ctrl+home	B
WO31	**The short-cut-key that is used to paste the selected text**	ctrl+v or ins	ctrl+c or ins	ctrl+x or ins	ctrl+v or Del	A
WO32	**The short-cut-key that is used for paragraph spacing(1.5)**	ctrl+2	ctrl+5	ctrl+1	none of the above	B
WO33	**The box that separate text from the document and allows it to behave like an independent object is known as**	Text Box	Frame	AutoShape	Border	A
WO34	**The object that is used to provide information like the title of the book, name of the chapter, page number etc.**	Header and Footer	Screen Tips	Page Layout	none of the above	A
WO35	**The object that helps us analyzing data statistically is known as**	Chart	WordArt	Auto Shapes	File	A
WO36	**To highlight certain parts of a page to set it apart from the rest of the page we make use of the following features**	Borders	Shading	WordArt	Bullets	D
WO37	**To clear all the tabs in a document the option that is clicked from the tabs dialog**	clear	remove all	remove	clear all	D
WO38	**The dialog box that is used to incorporate picture bullets into our documents or web pages is**	picture bullets dialog box	arrow bullet dialog box	circle bullet dialog box	none dialog box	A
WO39	**The object that composes of set of tools which helps to create and work on different shapes like rectangles, circles, flowcharts etc.**	charts	WordArt	AutoShapes	files	C
WO4	**When word is opened a new document called_____ is displayed, where the user starts typing the content right way**	doc1	document1	new document	default document	B
WO40	_____ is an online dictionary maintained by word to obtain synonyms for words	thesaurus	hyphenation	mail merge	none of t he above	A
WO41	**The thesaurus is invoked by pressing_____**	shift+f7	thesaurus menu	shift+f8	tools+spelli ng menu	A
WO42	**When a new table is created the insertion point flashes in the _____**	first	second	first row	last cell of the t able	A
WO43	**By pressing the _____ key inserts a blank row after the last row in the table**	tab	end	enter	none of the above	A
WO44	**The _____ option enables us to convert text into a table format**	convert text to table	convert data to table	table auto format option	none of the above	A
WO45	**A table consists of _____ that contain text or graphics**	row	rows & columns	records	none of the above	B

WO46	The _____ option in word allows the user to automatically correct misspell words as and when they are typed	AutoCorrect	AutoFormat	style gallery	none of the above	A
WO47	_____ is a facility that enables recording and replaying of a sequence of keystroke	Mail Merging	Macro	Data Source	none of the above	B
WO48	In Word Macros are written in _____	basic	visual basic	vj++	visual FoxPro	B
WO49	In Word 2000 the macro dialog box is activated with the help of ____ key combination	shift+f8	shift+f7	alt+f8	alt+f5	A
WO5	_____shows how a document would look like when published on the web or on an intranet	web layout view	online layout view	browser	none of the above	A
WO50	_____ is a software for sending and receiving e-mail messages	email client	outlook express	micro soft outlook	hotmail	A
WO51	_____is the coding system used to create web pages	html	xml	sgml	vb script	A
WO52	The network that makes information easily accessible across various networks is _____	internet	intranet	arpanet	LAN	A
WO53	Which of the following statements are false with reference to the use of a header row source for a mail merge	field name must be listed in the same order as the corresponding information in the data source	the field separators in a header source and the data source can not be set as paragraph	field names in the header source must match any merge fields you've inserted in the main document	the number of fields names in the header source must be the same as the number of data fields in the data source	B
WO54	With reference TO TABLE WHICH OF THE FOLLOWING STATEMENT ARE false	it is not possible to change the height of only selected rows of a table	auto format option applies to the entire table and not only to the selected rows or columns of a table	by default cell height and weight option applies to all the rows and columns of a table	delete cells option allows to delete the entire row or a column or shift cells up or shifts cells left	C
WO55	The alignment available for tabs does not include	left	decimal	justified	top	A

		A	B	C	D	
WO56	**Which of the following statements related to a Section Break are True**	A new section is created in order to change properties like number of columns	In order to type a header from the third page of the document a section break is inserted after t he third page	If a header is inserted in the second section then the same header is applicable to the first section	A section is a portion of a document in which certain page formatting option can be set	D
WO57	**The user can set a spelling checker to skip the marked part of the next**	true	false			A
WO58	**New option under the file menu of word creates a new blank document that is based on the normal templates**	true	false			A
WO59	**The user can split the screen only into two parts**	true	false			A
WO6	**The features that enables the user to type text graphics tables anywhere in the document without pressing enter or tab**	drag & drop	click -n-type	Double Click	none of the above	B
WO60	**The user can modify the picture from the clip art**	true	false			A
WO61	**With reference to auto correct which of the following statements are false**	automatically corrects common typing, spelling errors	prohibits the user from renaming an auto correct entry	automatically corrects the grammatically errors	with t he caps lock key accidentally turned on reverses the case of the letters that were capitalized incorrectly and then turns off the caps lock	B
WO62	**With the reference to password protected documents which of the following statements are false**	password can not include spaces	password protected document can be opened without password as read only	password are not case sensitive	password can be upto 15 characters long	B

Code	Question	A	B	C	D	Ans
WO63	**The alignment available for tabs does not include**	left	justified	hanging	top	A
WO64	**Which of the following statements are False**	a .ppt file can not not be inserted at specified position in the current document	a document file can be inserted in the current document at specified position	a multiple documents files can be inserted in the single document	an .xls data can not be inserted at specified position in the current document	B
WO65	**Drop Cap tool does not work for the contents in the table format**	true	false			A
WO66	**The user can split the screen only into two parts in MS-Word**	true	false			A
WO67	**The special symbols that are inserted using "insert symbol" option of the word can not be printed by the printer as they are not standard keyboard symbols**	true	false			B
WO68	**The "format columns" option allows to create columnar text up 12 columns only.**	true	false			A
WO7	**The document that makes the user to organize and maintain a long document, such as multipart report or a book consisting of chapters**	Master Document	Child Document	Hyperlink Document	none of the above	A
WO8	**The view that enables us to view how objects will be positioned on the page when it is printed**	Print Layout View	Page Layout	Outline Layout	none of the above	B
WO9	**The mode that is initialized or toggled to if the user is in a position to overwrite the text in the word**	Insert Mode	Type Over mode	Remove	none of the above	A
BC1	**ISDN stands for _____.**	Integrated system dynamic networks.	Integrated Symbolic Digital networks.	Integrated Services Digital network.	None of the above.	C
BC2	**_____ is the Worlds largest computer network .**	Ethernet	Internet	ARPANET	None of the above.	B
BC3	**_____is/are a popular front end tool**	visual basic	power builder	SQL * plus	all of the above	D
BC4	**When LAN connected together ,it is called _____ .**	MAN	WAN	GAN	None of the above.	B
BC5	**TCP/IP stands for _____ .**	Transfer control protocol/Internet protocol	Transfer communication protocol/Internet protocol	Transmission control protocol/Internet protocol	None of the above.	C
BC6	**Data is broken into small unit called _____ .**	Cells	Bits	Packets	None of the above.	C

ID	Question	A	B	C	D	Ans
BC7	**SMTP stands for _____ .**	System modulation transfer protocol	Software Mail transmission protocol	Simple Mail transfer protocol	None of the above.	C
BC8	**The _____ protocol is a network protocol to be built for the World Wide Web .**	Transfer Protocol	Transmission protocol	Hyper text	None of the above.	C
BC9	**ATM stands for _____ .**	Aggregate transfer mode	Asynchronous transfer mode	Area transfer mode	None of the above.	B
BC10	**The computer which can receive data from other computers on the network and print it is _____**	File server	Printer server	Receiver	None of the above.	B
BC11	**The hardware and the software requirements together form the_____**	platform	configuration	package	system	A
BC12	**ATM, Asynchronous transfer mode is a _____ technology.**	MAN and WAN	LAN and WAN	LAN and MAN	LAN WAN and MAN	B
BC13	**_____ is designed telephone system**	ISDN	ATM	Internet	Intranet	A
BC14	**Expansion of ISDN is _____**	Internal Services Digital Network	Internal Services Design Network	Integrated Services Digital Network	None of the above.	C
BC15	**Expansion of WBT is _____**	Web based Training	Web based Technology	Web based Transport	Web based Transaction	A
BC16	**_____ connects LANs.**	Bridges	Routers	Protocol	Repeaters	B
BC17	**Collection of instruction is called a _____**	procedure	batch	command	program	D
BC18	**Combination of alphabetic and numeric data is called _____ data**	alpha numeric	alpha beta	numerous alpha	number and alpha	A
BC19	**Computers can be classified based on _____,_____and _____**	space occupied, price, no. of users allowed	cost, performance their ratio	size, performance, cost	input, output, performance ratios	C
BC20	**_____ are used in large organizations for large scale jobs**	mini computers	microprocessors	PCs	mainframes	D
BC21	**_____ is responsible for feeding data into the computer**	input	output	feed	write	A
BC22	**_____ is the capability of the o/s to run numerous applications simultaneously**	multiprocessing	multithreading	multiplexing	multitasking	D
BC23	**_____ involves conversion of raw data into some meaningful information**	interpreter	compiler	converter	process	D
BC24	**_____ is responsible for obtaining the processed data from the computer**	input	processor	ram	output	D

		A	B	C	D	Ans
BC25	_____ printers use light to produce the dots needed to form pages of characters	impact printers	drum printers	non-impact desktop printers	thermal printers	C
BC26	Hardware components in a computer are _____,_____,_____,_____	operating system, bootstrap, kernel, shell	control program, interpreter, assembler, compiler	monitor, program, keyboard, bus	CPU, memory, input, output	D
BC27	_____ software are programs that are complex and can be developed or purchased	operating system	application software	windows 95	interpreter	B
BC28	_____ is a set of special instructions used to communicate effectively with the computer	batch	protocols	software's	procedures	C
BC29	_____ converts a high level language into machine language	processor	compiler	assembler	coder	B
BC30	_____ translates assembly language program into machine language instructions	compiler	interpreter	assembler	processor	C
BC31	_____ software enables users to send and receive data to/from remote computers	application	system	operating system	communication	D
BC32	A _____ is a running instance of an application	project	model	pilot project	process	D
BC33	Splitting of CPU's time for different tasks _____ prevents time slicing	multiprocessing	multithreading	multiplexing	multitasking	D
BC34	_____ computers are used in large organizations for large scale jobs which have large storage capacities	mainframes	super computers	micro computers	none of the above	A
BC35	_____ is responsible for all calculations and logical operations that have to be performed on the data	control unit	arithmetic and logic unit	central processing unit	none of the above	B
BC36	_____ printer use laser light	band printer	drum printer	non impact printer	none of the above	C
BC37	_____ software enhances the user to enter ,store, manipulate and print any text	data management	word processing	electronic spreadsheet	none of the above	B
BC38	_____ software enables users to send and receive data to/from remote computers	integrated software	communication software	idea processor	none of the above	B
BC39	_____ is the temporary storage place for deleted files	my computer	recycle bin	Microsoft exchange	none of the above	B
BC40	_____ is a collection of related fields	field	file	record	none of the above	C
BC41	_____ language consists of strings of binary numbers	assembly language	machine language	high level language	none of the above	B
BC42	_____ symbol is used to represent processes like assigning a value to a variable or adding a number	terminator symbol	processed symbol	connector symbol	input/output symbol	B
BC43	_____ is an example for micro computer	PC-at	hp vectra system	fazitsu vp200 series	IBM-PC	B

Code	Question	A	B	C	D	Ans
BC44	_____capability supports concurrent users doing different tasks	multiprocessing	multithreading	multiplexing	none of the above	D
BC45	The _____ do not have processing power of their own and has only a screen, keyboard and the necessary hardware to communicate with the host. For this reason, the terminals are referred as_____	"dumb terminals"	dumb servers	dummy terminals	dummy servers	A
BC46	A_____is nothing but a PC with a network operating system	wan	distributed computing system	windows NT	LAN	D
BC47	_____system is responsible for handling the screen and user I/O processing	host	server	back end	front end	D
BC48	The_____ handles data processing and disk access in a Client/Server architecture	host	server	back end	front end	C
BC49	Both the DBMS and the application resides on the same component in a ____system	PC	LAN	distributed computing	centralized	A
BC50	When all the processing is done by the mainframe itself, the type of processing is sometimes called as	server processing	host processing	dumb processing	data processing	B
BC51	DBMS models can be grouped under____ categories	four	one	two	many	A
BC52	_____is the most advantageous database system	file management system	hierarchical database system	network database system	relational database system	D
BC53	A new user initiates a new process of execution at the background,while the user can continue his query process as usual in the foreground. This situation is referred to as _____	multiprocessing	multithreading	multiplexing	none of the above	B
BC54	The process of data being automatically written to a duplicate database is called_____	repairing	redo logging	disk defragmentation	disk mirroring	D
BC55	Modem stands for _____ .	Code/De-code	Modulation/Demodulation	Module/De-module	None of the above	B
BC56	Multiple changes to the same record or a field are prevented by the DBMS through_____	fixes	locks	constraints	traps	B
BC57	_____allows an application to multitask within itself	multiprocessing	multithreading	multiplexing	none of the above	B
BC58	LAN stands for _____ .	Linear area networks	Local area networks	Local array of networks.	None of the above	B
BC59	New process of execution is referred to as_____	task	process	thread	client-server	C

ID	Question	Opt A	Opt B	Opt C	Opt D	Ans
CA107	In integrated test facility approach the auditor should ensure that the impact of test transaction is subsequently eliminated from the computer files	TRUE	FALSE			A
CA108	In olrt the cpu should posses the capability of program interrupt interrupts	TRUE	FALSE			A
CA109	In system testing,test involves _____	BOTTOM UP TESTS	TOP DOWN TESTS	HYBRID TESTS	ALL THE ABOVE	D
CA11	All input records in a batch are normally of different types	TRUE	FALSE			B
CA110	In the planning phase gathering information and risk assessment will be done	TRUE	FALSE			A
CA111	Information collection encompasses logging the selected auditable events	TRUE	FALSE			A
CA112	Input controls are designed to ensure processing safety	TRUE	FALSE			B
CA113	Integrated test facility is a facility of _____	PARALLEL PROCESSING	SOURCE CODE REVIEW	TEST DATA APPROACH	NONE OF THESE	C
CA114	Internal tables are stored tables from which certain values are extracted for further processing and storing	TRUE	FALSE			A
CA115	Log analysers are _____ required by the auditor	HARDWARE	SOFTWARE	NETWORK	NONE OF THESE	B
CA116	Log analyzers is _____	AUDIT TOOL	SOFTWARE	MACHINE ACTIVITY	SOFTWARE USED TO READ AND ANALYZE RECORDS OF MACHINE ACTIVITY	D
CA117	Log analyzer is a software used by auditor to detect virus	TRUE	FALSE			B
CA118	Mapping software is used by the auditor to list unused program instruction has veryspecific objectives	TRUE	FALSE			A
CA119	Master file configuration includes _____	REFERENCE FILE	TABLE FILES	REPORT FILE	NONE OF THE ABOVE	D
CA12	All material application -oriented events that occur within the boundary sub-system should be recorded in the accounting audit trail	TRUE	FALSE			A
CA120	Master file contains current records for identification and summarising	TRUE	FALSE			B

CA121	**Metadata approach is _____**	APPROACH TO THE SYSTEM DATA ONLY	APPROACH TO THE APPLICATION DATA ONLY	IT IS DATA ABOUT SOME OTHER DATA	ALL THE ABOVE	C
CA122	**Modeling is a variety of software which _____**	CAN BE VERY POWERFUL ANALYTICAL TOOL	CAN ENABLE THE AUDITOR TO EXAMINE PROVISION ON A NUMBER OF DIFFERENT BASES	CAN PROVIDE THE AUDITOR WITH USEFUL INFORMATION ON TRENDS AND PATTERN	ALL THE ABOVE	D
CA123	**One-to-one relationship means a single entity to a single entity in a monogenus structure**	TRUE	FALSE			A
CA124	**On-line processing refers to grouping of transaction processing the same in one go from start to finish**	TRUE	FALSE			B
CA125	**On-line testing can be targeted for specific function carried out by programs**	TRUE	FALSE			A
CA126	**Operating systems are devised to optimise the machine capabilities-the function include:**	SCHEDULE JOBS	MANAGE HARDWARE AND SOFTWARE RESOURCES	ENABLE MULTI USER RESOURCE SHARING	ALL THE ABOVE	D
CA127	**Parallel processing is a concept associated with _____ and _____**	OS AND RAM	OS AND ROM	OS AND MICROPROCESSOR	NONE OF THE ABOVE	C
CA128	**Parallelsimulation is there to authenticate the _____ system**	REEL SYSTEM	REAL SYSTEM	BOTH (A) AND (B)	DATABASE SYSTEM	B
CA129	**Prevention,detection,investigation and reaction are the _____ of an auditor**	FUNCTION	ROLE	BOTH (A) AND (B)	NONE OF THESE	B
CA13	**Any audit enable software may include _____**	COMPLETENESS	ACCURACY	AVAILABILITY	ALL THE ABOVE	D
CA130	**Procedure driven approach of auditing is _____**	TRADITIONAL APPROACH	LATEST APPROACH	BOTH (A) AND (B)	NONE OF THE ABOVE	A
CA131	**Processing controls can be grouped into general controls**	TRUE	FALSE			B

ID	Question	A	B	C	D	Ans
CA132	Program code analysis involves _____	PROVIDES DETAILED INFORMATION ON MACHINE USAGE	IDENTIFIES PROGRAM CODES WHICH MAY BE THERE FOR FRAUDULENT REASON	EXAMINATION OF SOURCE CODE OF A PROGRAM WITH A VIEW TO FOLLOWING THE LOGIC OF A PROGRAM	NONE OF THE ABOVE	C
CA133	Programme code analysis is being implemented by the _____	COMPANY	DATABASE ADMINISTRATOR	AUDITOR	AUDITOR USING COMPUTERS	D
CA134	Public audit trail is an important control in system that use _____ for authentication purposes	PUBLIC KEY	PRIVATE KEY	DIGITAL SIGNATURE	NONE OF THESE	C
CA135	Rdbms is a structured into a series of 2-dimensional table	TRUE	FALSE			A
CA136	Real time refers to the technique of updating files with transaction data immediately after the occurrence of the event to which it vrelates	TRUE	FALSE			A
CA137	Reasonableness checking is	TYPE OF RECORD CHECK	TYPE OF RANGE CHECKS	TYPE OF SIGN TEST	NONE OF THESE	A
CA138	Recording transactions in a controlled manner may amount to loss of stored data	TRUE	FALSE			B
CA139	Regular cross-system validation may minimise frauds	TRUE	FALSE			A
CA14	Application controls can be categorized into _____ types	4	2	5	3	D
CA140	Risk assessment is a phase of an audit	TRUE	FALSE			A
CA141	Risk assessment is the phase of _____	AUDIT	AUDIT THROUGH COMPUTERS	ALL THE ABOVE	NONE OF THE ABOVE	B
CA142	Scarf involves embedding audit software modules within an application system to provide continuous monitoring	TRUE	FALSE			A
CA143	Security audit can be done through oracle database	TRUE	FALSE			A
CA144	Security can be broken into _____ areas	RISK AVOIDANCE	DETERRENCE	PREVENTION	ALL THE ABOVE	D
CA145	Sign test is a type of field checks on processed data	TRUE	FALSE			A
CA146	Snapshot is a software which takes a "picture" of a file or data or a transaction processing through the system	TRUE	FALSE			A

CA147	**Snapshot is a technique of _____ which is a part of audit software**	AUDIT ROUTINE	AUDIT TECHNIQUE	AUDITING	NONE OF THESE	A
CA148	**Source code review means _____**	IDENTIFYING ENORMOUS CODE	IDENTIFYING INEFFECTIVE CODE	IDENTIFYING NON-STANDARD CODE	ALL THE ABOVE	D
CA149	**Specialised audit programs may be _____**	PREPARED BY THE AUDITOR	PREPARED BY THE ENTITY	PREPARED BY AN OUTSIDE PROGRAMMER ENGAGED BY THE AUDITOR	ALL THE ABOVE	D
CA15	**Application controls grouped into**	TWO GROUPS	THREE GROUPS	FOUR GROUPS	ALL THE ABOVE	B
CA150	**Super computer are the largest and fastest and is very suitablefor commercial applicationincluding audit work**	TRUE	FALSE			A
CA151	**System development control, apart from others,include authorisation,approval,testing,implementation and documentation of new systems software and system software modification**	TRUE	FALSE			A
CA152	**System privilege can be checked by auditor**	TRUE	FALSE			A
CA153	**System security audit is an on site inspection ,which identifies potential securityvulnerabilities within an organization**	TRUE	FALSE			A
CA154	**Test data can be defined as _____**	SAMPLE OF DATA USED FOR THE PURPOSE OF TESTING THE SYSTEM SOFTWARE	SAMPLE OF DATA USED FOR THE PURPOSE OF CHECKING LOG FILES	SAMPLE OF DATA USED FOR TESTING THE APPLICATION PROGRAMME PROGARMME	ALL THE ABOVE	C
CA155	**Test data pack is _____**	STREAM OF DATA	STREAM OF DATA THAT ARE GENERATED BY TEST DATA TECHNIQUE TOOLS	BOTH (A) AND (B)	NONE OF THESE	B
CA156	**The contents of a field could determine _____ sign for _____ field**	INVALID	BOTH C & D	VALID	NUMERIC	B

CA157	**The move towards paperless edi would eliminate much of the traditional audit trail,radically changing the nature of audit evidence**	TRUE	FALSE			A
CA158	**The stream of data that are generated by these tools is called as the _____**	TEST DATA	TEST DATA APPROACH	TEST DATA PACK	NONE OF THE ABOVE	C
CA159	**The transition from manual system to cis environment bring dramatic changes including**	CHANGE IN THE METHOD OF RECORDING ACCOUNTING TRANSACTION	USE OF ACCOUNTING CODES	ABSENCE OF AUDIT TRAIL	ALL THE ABOVE	D
CA16	**Ar=ir*cr*dr**	TRUE	FALSE			A
CA160	**The validation checks applied to a field depend on the fields logical interrelationships with other fields in the record**	TRUE	FALSE			A
CA161	**There are _____ types of approaches of test data techniques**	ONE	TWO	THREE	FOUR	B
CA162	**There are _____ types of control totals**	2	4	3	5	B
CA163	**There are _____ types of audits of the systems development process**	THREE	FOUR	TWO	ONE	A
CA164	**There are _____ types of checks that can run when data is input through a terminal**	FIVE	THREE	FOUR	ONE	C
CA165	**There are _____types of checks frequently used in validating the data**	4	2	5	3	A
CA166	**There are 13 system development phases while audit of the system development processes**	TRUE	FALSE			A
CA167	**There are four type of audit risks**	TRUE	FALSE			B
CA168	**Top down tests,bottom up tests and hybrid tests are under the _____ category**	INTER TABLE TEST	SYSTEM TEST	TABLE LEVEL TESTS	NONE OF THESE	B
CA169	**Tracing helps to analyse the change caused by viruses**	TRUE	FALSE			A
CA17	**Assembler language uses mnemonic symbols**	TRUE	FALSE			A
CA170	**Transaction file contain relatively permanent records take product profile,customer profile,employee profile etc.**	TRUE	FALSE			B
CA171	**Transactions are not lost ,added,duplicated or improperly changed is called as control over input**	TRUE	FALSE			A
CA172	**Validation checks is applied to a field depend on the field's logical interrelationships with other fields in the records**	TRUE	FALSE			A

ID	Question	A	B	C	D	Ans
CA173	Whenever monetary transaction are processed against master files,the update program should maintain a correlation account to record such transaction that does not have a matching master file record	TRUE	FALSE			B
CA174	White box testing focuses on finding if there are any defective execution paths in a program	TRUE	FALSE			A
CA175	White box approach is program based	TRUE	FALSE			B
CA176	With olrt where interactive data entry is available ,the master file associated with a transaction may be searched for confirming data	TRUE	FALSE			A
CA18	Audit around the computer is called	BLACK BOX APPROACH	WHITE BOX APPROACH	BOTH (A) AND (B)	NONE OF THESE	A
CA19	Audit risk cannot be viewed as a joint probability of inherent risk,control risk and detection risk	TRUE	FALSE			B
CA2	White box approach necessarily involves expert knowledge on the part of auditor	TRUE	FALSE			A
CA20	Audit software is a type of audit technique	TRUE	FALSE			A
CA21	Audit software is used by the auditor to _____	READ DATA ON CLIENT'S FILES	PROVIDE INFORMATION TO THE AUDIT	REPERFORM PROCEDURES CARRIED OUT BY THE CLIENT'S PROGRAMS	ALL THE ABOVE	D
CA22	Audit software can be categorized under _____ heads	2	4	5	3	D
CA23	Audit software can be divided into _____ categories	TWO	FOUR	THREE	NONE OF THESE	C
CA24	Audit through can be done using simulation	TRUE	FALSE			A
CA25	Audit trail should be periodically analysed to detect any control weaknesses of the system	TRUE	FALSE			A
CA26	Audit with networking and database help is called _____	WHITE BOX APPROACH	BLACK BOX APPROACH	ALL THE ABOVE	NONE OF THE ABOVE	A
CA27	Auditing is a form of attestation	TRUE	FALSE			A
CA28	Auditor can also check default roles in oracle database software	TRUE	FALSE			A
CA29	Auditor can combine functional capabilities of generalized audit software to accomplish the task of _____	EXAMINE THE THE QUALITY OF SYSTEM PROCESS	CARRYING ANALYSING REVIEW	EXAMINING THE QUALITY OF DATA	ALL THE ABOVE	D

ID	Question	A	B	C	D	Ans
CA3	_____ Is the file management software package that lets users and programmers organise data into files and then process those files	FILE	FILE-O-MAN	THE FILE MANAGER	FILEPET	C
CA30	**Auditors can issue the sql commands to audit**	TRUE	FALSE			A
CA31	**Auditors can use profiles in their white-box approach of auditing**	TRUE	FALSE			A
CA32	**Auditors cannot use generalised audit software to extract the data needed for audit purposes**	TRUE	FALSE			B
CA33	**Auditors has to take care of the fact to link between multiple databases with one application**	TRUE	FALSE			A
CA34	**Base case system evaluation includes _____**	FICTITIOUS DATA APPLIED AGAINST THE CLIENT PROGRAM	COMPARISON OF SOURCE VERSION OF A PROGRAM	ANALYSING THE PICTURE OF A FILE OR DATA	ALL THE ABOVE	A
CA35	**Black box approach is specification based**	TRUE	FALSE			A
CA36	**Black box testing is _____ based and white box testing is _____ based**	BOTH C & D	HARDWARE	SPECIFICATION	PROGRAM	A
CA37	**Black box testing seeks to determine whether application output is what it is supposed to be**	TRUE	FALSE			A
CA38	**Caat do not contain package programs, purpose written programmes,utility program or system management program**	TRUE	FALSE			B
CA39	**Caat's are computer program and data the auditor uses as part of audit procedures to process data of audit significance contained in an entity's information system**	TRUE	FALSE			A
CA4	**A sample size calculator program assists auditors in determining rand() function**	TRUE	FALSE			B
CA40	**Caat's are computer programs and data the auditor uses as a part of the audit procedures**	TRUE	FALSE			A
CA41	**Case-is _____**	COMPUTER AIDED SOFTWARE EDITOR	COMPUTER AIDED SOFTWARE EMBEDDED	COMPUTER AIDED SOFTWARE ENGINEERING	NONE OF THESE	C
CA42	**Check digit is a group of numbers added to a code for determining the accuracy of other digits with code**	TRUE	FALSE			B
CA43	**Check digit is a tool under field checks**	TRUE	FALSE			A
CA44	**Check digit is a type of _____**	FIELD CHECKS	RECORD CHECKS	BOTH (A) AND (B)	NONE OF THESE	A
CA45	**Codd's rule are being implemented on database**	TRUE	FALSE			B

ID	Question	Opt A	Opt B	Opt C	Opt D	Ans
CA46	Computer assisted audit technique involves the use of computer through "black box " approach	TRUE	FALSE			B
CA47	Computer operation controls are designed to provide _____	THE USE OF COMPUTERS BY ALL CONCERNED	PROVIDING ACCESS TO COMPUTER TO ALL ORGANIZATION PERSONEL	USE OF ANY PROGRAMS	NONE OF THE ABOVE	D
CA48	Computer security is frequently associated with confidentiality ,integrity and authentication	TRUE	FALSE			A
CA49	Concurrent audit include auditors as members of s.d team	TRUE	FALSE			A
CA5	A sequence check on the transaction or master file by an update program is not required	TRUE	FALSE			A
CA50	Concurrent audit is taking care of the _____ data that is being transacted	PREVIOUS DATA	CURRENT DATA	ALL THE ABOVE NONE OF THESE	NONE OF THESE	B
CA51	Confidentiality,integrity and availability are the major security attributes to the auditor	TRUE	FALSE			A
CA52	Control total is under batch checks	TRUE	FALSE			A
CA53	Controls are present over many aspects of the computer system and its surrounding social environments	TRUE	FALSE			A
CA54	Controls are required for authorisation,to ensure data integration and to detect possible breachesin security	TRUE	FALSE			A
CA55	Conventional data entry giving way to scanner,digitised image processors etc. For auditing in cis environment	TRUE	FALSE			A
CA56	Core image comparison is a _____ used by the auditor	TYPE OF NETWORK	TYPE OF SOFTWARE	TYPE OF HARDWARE	NONE OF THESE	B
CA57	Core image comparison is a type of audit technique	TRUE	FALSE			A
CA58	Core image comparison is particularly useful where only executable versions are distributed	TRUE	FALSE			A
CA59	Critical review of the system of book-keeping,accountingand internal organizational controls.	TRUE	FALSE			A
CA6	A system could be _____	NATURAL/MAN MADE	OPEN/CLOSED	CONCEPTUAL/ PHYSICAL	ALL THE ABOVE	D
CA60	Cryptographic techniques are the part of security audit	TRUE	FALSE			A
CA61	Data communication and networking would introduce new audit risk	TRUE	FALSE			A
CA62	Data from client application are not stored in the organisations database through auditable events and functions	TRUE	FALSE			B

CA63	**Data integrity can be imposed on the database through dbms**	TRUE	FALSE			A
CA64	**Data reverse engineering process metadata to document system and abstract business rules and relationships**	TRUE	FALSE			A
CA65	**Data security in audit techniques can be done through three ways**	TRUE	FALSE			A
CA66	**Database analyser is a software which provides detailed information concerning the operation of the database**	TRUE	FALSE			A
CA67	**Databases are a key element in most business-related information systems**	TRUE	FALSE			A
CA68	**Ddl,dml,dcl-statements can be exercised in rdbms**	TRUE	FALSE			A
CA69	**Deterrenece meance _____**	THREAT	BROADCASTING	NETWORK	NONE OF THESE	A
CA7	**A system ehibit entropy**	TRUE	FALSE			A
CA70	**Dss has the following components**	DATABASE	PLANNING LANGUAGE	MODEL BASE	ALL THE ABOVE	D
CA71	**Dss is defined as a system that provides tools to managers to assist them in solving structural problem**	TRUE	FALSE			B
CA72	**Embedded audit routines are sometimes built into an entity's computer system to provide data for later use by the auditor**	TRUE	FALSE			A
CA73	**Embedded code is a software used by the auditor to examine backup**	TRUE	FALSE			B
CA74	**Embedded code performs a wide variety of audit tasks**	TRUE	FALSE			A
CA75	**Errors are corrected :_____**	AT THE YEAR END	IMMEDIATELY	ON QUARTERLY BASIS	NONE OF THE ABOVE	B
CA76	**Event detection is an audit procedure**	TRUE	FALSE			A
CA77	**Event detection is the audit procedures**	TRUE	FALSE			A
CA78	**Examine the quality of data is not the task of generalized audit software**	TRUE	FALSE			B
CA79	**Examine the quality of system processes is _____**	AUDIT TASK OF THE AUDITOR	AUDIT TASK OF THE AUDITORS USING COMPUTERS	AUDIT TASK OF THE GENERALIZED AUDIT SOFTWARE	ALL THE ABOVE	C
CA8	**A system means -totality**	TRUE	FALSE			A
CA80	**Field check is exclusive to a field**	TRUE	FALSE			A
CA81	**File access is a function of _____ software**	GENERALIZED AUDIT	SPECIALIZED AUDIT	UTILITY PROGRAM	NONE OF THESE	A

CA82	**File access will be the functional capabilities of generalized audit software**	TRUE	FALSE			A
CA83	**File activity is the proportion of transaction file records that are actually used or accssed in a given processing run**	TRUE	FALSE			B
CA84	**File integration refers to the _____ of information from a file**	BACKUPS	RETRIEVAL	DELETION	ADDITION	B
CA85	**File volatility refers to the number of additions and deletions to the file in a given period of time**	TRUE	FALSE			A
CA86	**For computerised auditing,usage of sophisticated audit software would be a necessity**	TRUE	FALSE			A
CA87	**For small to medium sized systems,individual modules are coded and individually tested and then assembled to be tested as a whole.the testing strategy is referred to as:**	C-BRAIN	BIG BANG	STUB	BOUNCING BALL	B
CA88	**General purpose software provides a framework for highly complex scientific operations**	TRUE	FALSE			B
CA89	**Generalised audit software could be used by the auditor for identifying inconsistencies or significant fluctuations**	TRUE	FALSE			A
CA9	**A transaction file is sorted prior to the update of master file**	TRUE	FALSE			A
CA90	**Generalised audit software function include _____**	FILE ACCESS/ORGANIZATION	STATISTICAL/ARITHMETICAL OPERATION	STRATIFICATION AND FREQUENCY ANALYSES	ALL THE ABOVE	D
CA91	**Generalised audit software never allow several files to be read simultaneously _____**	TRUE	FALSE			B
CA92	**Generalized audit software consists _____**	PACKAGE COMPUTER PROGRAM FOR PERFORMING A VARIETY OF DATA PROCESSING FUNCTION	MATHEMATICAL CONCEPTS	A MASTER LIST TRANSACTION	ADMINISTERED QUESTIONNAIRE	A
CA93	**Generalized audit software has infile capabilities for verifying processing logic**	TRUE	FALSE			A
CA94	**Generalized audit software has only limited capabilities for verifying processing logic**	TRUE	FALSE			A
CA95	**Generalized audit software permits auditors to undertake only expost auditing and not concurrent auditing**	TRUE	FALSE			A

CA96	**Generalized audit software provides the full set of arithmetic operators**	TRUE	FALSE			A
CA97	**Hash total is a type of _____**	CONTROL TOTAL	TRANSACTION TYPE	BATCH SERIAL NUMBER	SEQUENC E CHECK	A
CA98	**Hash totals falls under control totals**	TRUE	FALSE			A
